Former CM Champai detained in Ranchi home

The Hindu Bureau
PATNA

The Jharkhand police put former Chief Minister and BJP leader Champai Soren under "house arrest" in Ranchi on Sunday to stop him from taking part in a protest organised by Adivasi groups against land acquisition by the State government for building a hospital in the city. He was released in the evening.

In a post on X, the BJP leader said the State government had tried to prevent tribal and indigenous farmers of Nagdi from voicing their protest. BJP State president Babulal Marandi said the action was "nothing short of a murder of democracy". Minister Irfan Ansari said it was government land, and its acquisition would have no impact on the tribespeople.

98.2% Bihar voters have submitted documents: EC

Remaining 1.8% have eight days to submit documents, rectify mistakes on draft rolls, the poll body says; officers will complete verification of 'eligibility documents' by September 25, it adds

The Hindu Bureau

NEW DELHI

The Election Commission said on Sunday that the special intensive revision (SIR) of electoral rolls in Bihar was on schedule even as the Opposition intensified protests against it.

The EC said it had received documents from 98.2% of the 7.24 crore electors in the State in 60 days. The remaining 1.8% voters had eight days to submit requisite documents that were not provided during enumeration, and to rectify mistakes on the draft electoral rolls published on August 1.

The EC said that 1.64% of the electors submitted documents per day. It said the electoral registration officers (ERO) and the as-

Status update

The Election Commission on Sunday said that the special intensive revision (SIR) of electoral rolls in Bihar is on schedule

- From June 24 to August 24, 98.2% of the electors submitted their documents
- On an average, the EC received documents from about 1.64% electors per day
- Electoral registration officers will take a final call on the claims and objections received
- The final electoral roll will be published on September 30

Drug racket busted, heroin worth ₹5 cr. seized: police

The Hindu Bureau
NEW DELHI

The Delhi police have busted a heroin syndicate operating in north-east Delhi with the arrest of two women drug peddlers and seizure of the contraband valued at around ₹5 crore in the international market, a senior police officer said on Sunday.

Deputy Commissioner of Police (Crime Branch) Sanjeev Kumar Yadav said during a raid on Friday, the accused, identified as Seema, 54, a resident of Nand Nagri and her sister-in-law Samita, 43, a Shahdara resident, were apprehended near the GTB Hospital while attempting to deliver a consignment of heroin in the Nand Nagri slums.

'My Vision of India: 2047': fixing pressing issues must take precedence over 'lofty planning', says Prof. Mehta

The Hindu Bureau
NEW DELHI

Addressing poverty, authoritarianism, communalism, and ecological degradation must take precedence over "lofty planning" exercises in India as the country approaches its centenary of Independence, noted political thinker Professor Pratap Bhau Mehta said on Sunday.

Delivering the D.S. Borker Lecture on 'My Vision of India: 2047 A.D.' at an event chaired by renowned journalist Harish Khare, Prof. Mehta cautioned against complacency in imagining the nation's future. He observed that while multiple 'Vision 2047' blueprints already exist, they often overlook pressing challenges.

Prof. Mehta outlined

three guiding perspectives: relieving human suffering, attaining developmental nation status through visionary leadership, and upholding constitutional values of liberty, equality, and fraternity. Elaborate plans are inadequate if issues such as poverty, communalism, authoritarianism, and ecological devastation remain unaddressed, he said.

A major concern raised was the collapse of sincerity, shared facts, and reasoned debate in civic life.

'Single greatest assault' Terming the rise of Hindutva nationalism in the country the "single greatest assault", Prof. Mehta said it shrinks India's universal civilisational identity into an ethnic framework and discards its universal spiritual codes.

Man held for Greater Noida dowry murder shot in leg during 'escape'

Husband, arrested on Saturday, tried to escape while being taken to family home to recover evidence; police sent to 14 days' judicial custody; mother-in-law arrested, other family members on the run a day after the woman died of 70% burn injuries

Alisha Dutta
NEW DELHI

A court in Uttar Pradesh on Sunday remanded Vipin Bhati, the prime accused in the alleged dowry murder of his 28-year-old wife, in 14 days' judicial custody.

On the same day, the police also arrested his mother, who is also charged in the case, even as other family members remain on the run.

The developments came a day after Nikki died of 70% burn injuries at Safdarjung Hospital, to which she had been referred from Fortis Hospital in Noida.

According to the police, she was allegedly set ablaze by her husband and in-laws at their residence in Greater Noida's Sirsa vil-

Police personnel carrying the accused who allegedly tried to escape custody before being shot in the leg during retaliatory firing. PTI

lage on Thursday. Mr. Vipin was arrested on Saturday and taken to the family home to recover evidence when he allegedly tried to escape custody.

"He snatched an officer's pistol and opened fire.

"no remorse". "I have not done anything. She died on her own. Fights between husband and wife happen everywhere. It's not a big deal," he said.

Hours after Mr. Vipin's arrest, the police apprehended Daya, Nikki's mother-in-law. Her brother-in-law and father-in-law remain at large.

Demands galore

The police were informed of Nikki's death by Fortis Hospital on August 21, after which her sister Kanchan lodged a complaint naming Mr. Vipin, his brother Rohit, mother Ms. Daya, and father Satveer for domestic violence.

The FIR includes charges under Sections 103(1) (murder), 115(2) (voluntarily causing hurt), and 61(2)

(criminal conspiracy) of the Bharatiya Nyaya Sanhita.

Ms. Kanchan said she and Nikki, married to two brothers in 2016, were routinely harassed for dowry. "We were beaten and tortured for days. They were demanding ₹36 lakh," she told reporters.

She said their parents had given an SUV, a motorcycle, cash, and gold at the time of marriage and continued to send gifts on Karwa Chauth, yet the demands did not stop.

Nikki's father Bhikari Singh Payla told *The Hindu*: "My daughter died many deaths while being married to him. Now she is gone. He should have been shot in the chest, and the other family members should be hanged."

Govt. may adopt Centre's bike taxi policy with gradual shift to electric fleet

Alisha Dutta
NEW DELHI

The Delhi government is likely to implement the Centre's new bike taxi policy that permits ride-hailing apps to use "non-transport motorcycles" in the Capital.

Senior officials said the State is considering adopting the July 1 regulatory framework of the Ministry of Road Transport and Highways (MoRTH) to issue licences and regulate aggregators.

In 2023, the then Aam Aadmi Party-led government introduced the Delhi Motor Vehicle Aggregator and Delivery Service Provider Scheme, which allowed private two-wheelers for commercial use only if they were electric.

Officials said that unlike the earlier government, the current BJP-led government favours a phased transition. "Unlike the previous policy on bike taxis, we intend on taking the route of a gradual transition to electric vehicles,"

The Centre's framework requires aggregators to meet government-set targets for inclusion of electric fleets. FILE PHOTO

one senior officer said.

The Centre's framework requires aggregators to meet government-set targets for the inclusion of

adopt the policy.

Safety concerns

The lack of regulation continues to raise safety risks. On July 21, a woman shared a viral video of herself falling off a bike taxi after being denied a helmet.

A check by *The Hindu* revealed that many bike taxi riders operate battery-fitted bikes without helmets.

Police stated that such vehicles, classified under GSR 29 (E), are not considered motor vehicles under the Motor Vehicles

Act, rendering the helmet rules unenforceable.

"The electric bikes available for rent are used widely by gig workers for delivery purposes. Owing to the classification, the traffic rules applicable to motor bikes do not apply to them," said the officer.

Traffic violations

Traffic police said bike taxis often create chaos by taking wrong turns, riding on the wrong side, and causing jams. Unlike delivery workers identifiable by

bags, bike taxi riders are difficult to track as their vehicles lack identifiers.

Dr. Rahul Goel of IIT-Delhi said a phased transition to an electric fleet is essential to avoid wastage of vehicles and market distortions from sudden regulation shifts. "This will ensure that the vehicles already being used are not mindlessly dumped, artificially reducing their lifespan; it will also give enough time to the fleet owners to plan their purchases," he said.

Pavithra M.B.

In an academic campus, one hopes to see equality sitting as an honoured guest in every classroom, and liberty walking without fear along every corridor. Education should be the great equaliser. Yet, in our campuses, who speaks, who is silenced, and who is invisibilised is still decided by prejudice – sometimes wearing the old mask of tradition, sometimes the new mask of "concern".

Early beginnings
The seeds of exclusion are sown early. At school, a girl may be applauded in class, yet denied a chance at the sports meet; not because of lack of skill but because someone has ruled "it's not for her". By the time she reaches college, another invisible wall rises: that of "appropriate" choices. Certain courses – those promising professional advancement – are branded unsuitable, not by syllabus, but by parental caution masquerading as care. The lofty phrase "self-determination", recited in Civics lessons, bends before the imagined ledger of marriage prospects.

Even after admission, the terrain is uneven. Opportunities for internships, research, and cultural work vanish with the early home-in-hour for women. Meanwhile, the guardians of safety – the security personnel and CCTV in isolated spaces and ill-lit paths – are either absent or unreliable. Cameras stand vigilant in crowded quadrangles but blink blind in lonely stretches.

No room for bias

Why gender justice must be embedded in India's campuses

What needs to be done

Intent must be matched by infrastructure: well-lit walkways, functioning CCTV in vulnerable zones, equitable hostel facilities. "Inclusive space audits", routine in Oxford and Melbourne, can be adapted here.

Language, too, must be cleansed of bias. Official notices, recruitment ads, and learning materials should speak the language of equality. Sensitisation cannot be a one-time event; it must be recurring, engaging, and campus-wide. Peer-led ambassador programmes can serve as the first door on which the students can knock on, often before they dare approach formal authorities.

Accountability must not be reduced to the ritual of an annual report. ICC findings must be reviewed independently, and violations met with corrective – not cosmetic – action. The worth of a university lies not merely in its stone facades or its placement statistics but in the citizens it shapes. A degree may

certify learning; the courage to challenge injustice certifies leadership.

True gender justice is not sentimental charity; it is a constitutional duty. In a society as plural as ours, campuses are rehearsal halls for democracy itself. If those who walk out of our gates carry with them fairness, empathy, respect and gender justice, then the institution has not only educated it has civilised.

The writer is Associate Professor, PG Department of Human Rights and Duties Education, Ehiraj College for Women, Chennai.

SCHOLARSHIPS

Legrand Empowering Scholarship

An initiative from Legrand

Eligibility: Meritorious girls, students who are differently-abled, LGBTQ+, COVID-affected, orphans, or have single parents and have scored 70% or above in Class 10 and 12 and have secured admission in B.Tech., B.E., B.Arch., B.B.A., B.Com., or B.Sc. courses whose annual family income does not exceed ₹500,000.

Rewards: Variable depending on category of students

Application: Online

Deadline: September 8

www.b4s.in/edge/LFLS12

Teach for India Fellowship

An initiative from Teach for India

Eligibility: Indian citizens or Overseas Citizens of India (OCI), who will graduate by June or July 2026 and are applying for the first time for the 2026 cohort.

Rewards: ₹25,344 a month plus benefits.

Application: Online

Deadline: September 7

www.b4s.in/edge/TFIF16

Kotak Life Insurance Scholarship

An initiative by Kotak Life Insurance Company Ltd.

Eligibility: Students from Tamil Nadu and Maharashtra who have got 60% or more in Classes 10 and 12 and are in the first year of B.Com and have an annual family income not exceeding ₹360,000 or less.

Rewards: Up to ₹30,000 a year

Application: Online

Deadline: September 7

Youth appears before police over Dharmasthala video

The police had issued two notices in connection with a *suo motu* case filed against the Karnataka resident following a 23-minute video on the alleged mass burial he had posted on his YouTube channel

The Hindu Bureau
MANGALURU

M.D. Sameer

Two days after obtaining anticipatory bail, YouTuber M.D. Sameer, who has been accused of posting a communally sensitive video on his channel on the alleged Dharmasthala mass burial case, appeared before the Belthangady police in Karnataka on Sunday.

The police had issued two notices asking Mr. Sameer, a resident of Bandihatti in Ballari town, to appear before the investigation officer in connection with a *suo motu* case registered against him by the police on July 12.

He had reportedly written to the police expressing concern over the recent attack on

sue, posted on his YouTube channel *Dhoota*.

The police said the video contained imaginary details, which were neither in the complaint filed by the 45-year-old sanitation worker nor in his voluntary statement recorded by a magistrate under Section 183 of the BNSS.

The details mentioned in the video revealed the identity of the complainant, who had been given protection under the Witness Protection Scheme. Mr. Sameer had widely shared this video and had tried to instigate breach of peace, the complaint said.

Bail granted

On August 21, the judge granted bail while observing, among others, that there was

no material produced by the prosecution to show Mr. Sameer as a habitual offender and the offence alleged against him was not of grave nature. The judge directed Mr. Sameer not to abscond and tamper with prosecution witness. He was also asked to appear before the investigation officer and cooperate in the probe into the case.

Mr. Sameer, activists Mahesh Shetty Thimarody and Girish Mattannavar, and others were accused in a separate case registered by the Belthangady Police in connection with the alleged assault on news reporter R. Harish in front of a hospital at Ujire on August 6, where three YouTubers who were allegedly assaulted were admitted.

8-year-old boy charred to death in Arunachal school hostel blaze

The Hindu Bureau
GUWAHATI

An eight-year-old boy was charred to death and three others were injured in a fire that broke out in a school hostel in Arunachal Pradesh's Shi-Yomi district on Sunday.

Officials said the boys' hostel of the Papikrung Government Residential School, about 85 km from Tato, the district headquarters, caught fire around 2 a.m. "The deceased boy was in Class 3," Superintendent of Police, S.K. Thongdok, said.

The three injured boys,

aged eight, nine, and 11 years, were admitted to a hospital in Tato. They were later shifted to another hospital at Aalo in the West Siang district. They were said to be out of danger.

Education Minister Pasang Dorjee Sona, who hails from the Shi-Yomi district, expressed shock over the incident. The fire was caused by a short circuit, he said. "I have instructed the district administration and school administration to carry out a thorough probe and to provide immediate support to the affected students and their families," he posted on X.

Kerala Cong. leader stays put as MLA despite calls to quit

The Hindu Bureau
THIRUVANANTHAPURAM

Rahul Mamkootathil, MLA and Congress leader in Kerala, on Sunday gave no definitive answer concerning bipartisan political calls for his resignation following accusations of sexual misconduct.

Mr. Mamkootathil, in a press conference at his residence at Adoor in Pathanamthitta, said he did not desire to push the Congress into political purgatory. Congress workers "should not hang their heads in shame" because of him.

Facing a volley of questions from presspersons who have been on a stakeout outside his house for several days, Mr. Mamkootathil said the startling accu-

sations had rendered him a recluse briefly.

"I am also a human being. Scores of party workers called me, some critical, others supportive and several deeply saddened," he said.

Broadcasting scepticism about the accusations of inappropriate behaviour swirling around him, Mr. Mamkootathil reasoned that his stature as a frontline defender of the Congress rendered him a magnet for political enemies.

The MLA sought to make a case in his defence by airing audio clips and WhatsApp chats to support his claim that a journalist had asked leading questions to a "transgender friend" of his to ensnare him in a politically damaging conspiracy.

Practising compassion

Underestimating the cost of animal shelters undermines them

The Supreme Court of India's proceedings on free-roaming dogs represent an earnest, even if inadequate, attempt to reconcile competing claims of compassion and safety. On August 11, the Court had directed the Municipal Corporation of Delhi to round up strays and confine them in shelters. Eleven days later, it changed course, permitting release after vaccination and deworming, and that aggressive or rabid animals be retained. India bears one of the world's heaviest burdens of rabies and anthropological accounts are clear that this threat shapes daily life, limiting children's movements and forcing families into repeated medical expenses. Rabies also disproportionately kills those least able to navigate the health system. While the Animal Birth Control Rules were updated in 2023, experience shows that without 70% sterilisation coverage, they are ineffectual. The August 11 order was significant because it acknowledged that the present framework, however well intentioned, is inadequate for India's dense settlements. Objections that shelters will be overcrowded and disease-ridden and that permanent impoundment will precipitate an ecological imbalance confront the same issues that undermine the Rules. Properly resourced and regulated shelters can be managed with veterinary standards, space norms and transparent oversight. India already maintains similar institutions for cattle on a large scale. But canine facilities are in squalor – which may have motivated the Court to change course – it will be due to the same administrative neglect and policy fragmentation between States that have kept sterilisation coverage from crossing 70% in any major city, and which have been keeping alive fears of other species migrating into the ecological niches dogs once occupied.

Street dogs are woven into India's urban fabric, even offering companionship to the homeless. Such perspectives deserve a place in cultural discourse but cannot override the human right to access public spaces without fear of injury. Compassion is not annulled if dogs are removed from public roads; they must still be compassionately rehomed, sheltered and, when incurably aggressive or ill, euthanised humanely. A modern statute must replace the outdated Prevention of Cruelty to Animals Act 1960. It should classify dogs as adoptable, shelter-bound or unfit and mandate municipal shelters with minimum standards. Crucially, governments should count stray dogs across States and determine the true cost of maintaining shelters rather than chronically underestimating it. This system should also have the support of the national veterinary cadre, better waste management and penalties for abandoning pets. Without these measures, urban India will keep trading visible menace for invisible neglect.

Man-made famine

The world must stop Israel from annihilating Gaza through starvation

For months, international rights groups, aid organisations and doctors who served in Gaza have warned that the enclave was on the brink of famine. Heartbreaking stories and images of starvation poured out as Gaza's civil defence groups repeatedly told the world that children were dying every day due to malnutrition. But Israel, waging a genocidal war in Gaza for the past 22 months, dismissed these reports as lies, while its western allies did little beyond expressing token concerns. Last week, the Integrated Food Security Phase Classification (IPC), a UN-backed body, confirmed that an entirely "man-made famine" is unfolding in Gaza's largest city and its surrounding areas, the first officially declared famine in West Asia. At least one in five households faces extreme food shortages, while a third or more of all children are acutely malnourished. The IPC also stated that at least two in every 10,000 people die daily from starvation or the deadly combination of malnutrition and diseases. Yet, if anyone expected such a devastating report by a reputed organisation to have had an impact on Prime Minister Benjamin Netanyahu's war-thirsty regime, they were mistaken.

Israel has long imposed restrictions on goods entering Gaza, that has been under Israel's blockade since 2007; it tightened those restrictions after Hamas's October 7, 2023 attack. But in March 2025, after Mr. Netanyahu broke a ceasefire, Israel imposed a total three-month blockade on all goods entering Gaza. When it began allowing a limited amount of food, a new U.S. and Israeli-backed organisation, the Gaza Humanitarian Foundation (GHF) replaced the previous UN-led food distribution system. The blockade, along with Israel's direct control of food distribution, plunged hundreds of thousands into acute hunger. When desperate, hungry Palestinians rushed to the limited food centres run by the GHF, they were shot down by Israeli troops and GHF volunteers in the name of crowd control. The UN estimates that more than 1,300 Palestinians have been killed at food centres since May. Despite mounting international outrage and allegations of war crimes, and Hamas's acceptance of the latest ceasefire proposal put forward by Qatar and Egypt, Israel has intensified attacks on Gaza city in preparation for a new offensive. What is unfolding now in Gaza goes far beyond Israel's statuted aims of defeating Hamas and releasing hostages. The growing body of evidence points to an intent to destroy Palestinian life and society in Gaza itself. The most brutal of crimes are being committed against 2.3 million people – in full view of the world. The world cannot allow Israel to continue devastating Gaza any further.

The new Constitution Bill, the need for a balancing act

Moral integrity in the political class is a paradox that India has continually struggled with. While, on the one hand, the electorate demands moral rectitude in the political class, there has, on the other, been a pervading spectre of criminality prevailing in the political class. The proposed Constitution (One Hundred and Thirtieth Amendment) Bill, 2025, that was introduced in the Lok Sabha on August 20, 2025, is aimed at filling this vacuum by providing a condition. Under this, Ministers, Chief Ministers and even the Prime Minister must either resign or automatically be subject to removal if they continue to be in custody even after a consecutive period of 30 days in crimes that carry a maximum punishment of five years or more of imprisonment.

On the surface, the action appears to be a decisive initiative toward enabling cleaner politics. It touches upon the disturbing fact of corrupt leaders in custody holding on to power, a situation that has made people lose trust in governance. But there are political pitfalls and constitutional quandaries that lurk beneath its promise.

The foundation for this Bill rests on Articles 75, 164 and 239AA of the Constitution, which deal with the appointment and tenure of Ministers in the Union, States and Delhi, respectively. While Articles 75(I), 164(I) and 239AA(5) mandate that Ministers shall hold office at the pleasure of the President of India (or Governor), this "pleasure" has been judicially interpreted within the bounds of constitutional morality and legal propriety, as in cases such as *Shamsher Singh and Anr. vs State Of Punjab and Nabam Rebia And Etc. Etc. vs Deputy Speaker And Ors.*

Judicial pronouncements

The Supreme Court of India, in *S.R. Bommai vs Union of India*, underscored the role of constitutional morality as a guiding principle, thus pronouncing that democratic institutions must be nurtured through integrity and accountability. Later, in *Manoj Narula vs Union of India*, the Court directly addressed the ethical dimension of ministerial appointments, warning that individuals with serious criminal charges should not be entrusted with executive power. Although the Court stopped short of mandating automatic removal, it clearly signalled that morality is intrinsic to the constitutional framework. The Bill, therefore, draws strength from these pronouncements, seeking to give legislative form to what has long been a judicially recognised moral imperative.

But this Bill's very ambition may be its Achilles' heel. The most glaring issue concerns the principle of presumption of innocence, which forms part of the right to life and liberty under Article 21. To equate arrest and detention with

Samayeta Bal

is an advocate, a former Legislative Assistants to Members of Parliament (LAMP) Fellow (2024-25), and, currently, a Parliamentary, Legislative and Policy Researcher

grounds for removal, without conviction or even the framing of charges, risks undermining this foundational constitutional value. Section 8(3) of the Representation of The People Act concerns the disqualification of members on the conviction of certain offences. In the case of *Lily Thomas vs Union of India*, the Supreme Court held that a lawmaker, only upon conviction, immediately stands immediately disqualified. The three-month window to file an appeal and continue as a legislator was also struck down, thus providing jurisprudential support for stringent accountability even before the existence of the Bill. Here, it is important to note that disqualification begins only when someone is convicted, and not when someone is arrested or detained.

The problem is compounded by the Bill's reliance on executive discretion through the insertion of Clause 5A after Clause 5 of Article 75, Clause 4A after Clause 4 of Article 164 and Clause 5A after Clause 5 of Article 239AA of the Constitution. Ministers can be removed on the advice of the Prime Minister or Chief Minister, but automatic removal kicks in if such advice is withheld. This dual mechanism politicises the process: a Prime Minister may shield allies for 30 days, while a hostile Chief Minister may allow rivals to fall by the automatic rule. Instead of insulating governance from partisanship, the Bill risks embedding accountability in the shifting sands of political calculation.

Inconsistency in treatment

The inconsistency in treatment between legislators and Ministers further complicates matters. Members of Parliament and Members of State legislatures face disqualification only upon conviction under the Representation of the People Act. By contrast, Ministers under this Bill would be forced to resign on mere detention. This creates a paradoxical situation wherein a legislator convicted of corruption may technically continue as a Minister until disqualified under the Act, while a Minister only under arrest would be forced out. The asymmetry may appear to elevate the standards for executive office, but it also undermines consistency in the constitutional treatment of public officials. It risks deterring capable individuals from accepting ministerial responsibility, knowing that they face harsher consequences than their legislative peers on the basis of unproven allegations.

There is also the problem of the "revolving door". Because the Bill allows reappointment once a Minister is released from custody, there could be cycles of resignation and reinstatement depending on the pace of legal proceedings. Imagine a Chief Minister who is arrested and detained for 31 days, who is forced to resign, but later released on bail and promptly reinstated by the Governor. The State would have endured

weeks of political uncertainty with little to gain in ethical accountability. Such instability may not only weaken governance but also incentivise tactical legal manoeuvres, where political actors use the law as a tool to manipulate executive offices.

Need for a more nuanced model

None of this is to deny the urgency of reform. The rise of criminalisation in politics is a stark reality. According to a comprehensive analysis by the Association for Democratic Reforms and National Election Watch of all 543 winning candidates in the 2024 general election, 251 Members of Parliament (46%) had declared criminal cases against themselves, up from 43% in 2019, 34% in 2014, and 30% in 2009, representing a 55% increase over 15 years. Yet, the bluntness of its approach risks undermining both the principle of fairness and the stability of governance. A more nuanced model would better serve the constitutional goal of clean politics without eroding democratic safeguards.

One pathway could be to link removal not to arrest but, instead, to judicial milestones such as the framing of charges by a competent court. This would ensure that only cases that pass initial judicial scrutiny trigger resignation, filtering out frivolous or politically motivated arrests. Another safeguard could be the establishment of an independent review mechanism, such as a tribunal or a judicial panel, to examine whether the conditions for removal have been met. This would prevent executive overreach and ensure impartial application. Similarly, instead of outright removal, the law could provide for interim suspension of ministerial functions during ongoing trials, allowing governance to continue without compromising accountability. Most importantly, the Bill should refine its scope to apply only to offences involving moral turpitude and corruption, rather than casting a wide net over any offence punishable with five years' imprisonment, which could include relatively minor criminal conduct.

In sum, the Constitution (One Hundred and Thirtieth Amendment) Bill, 2025, stakes out a significant normative position that citizens might welcome as a forceful stand against corruption and criminality. But its formulation elides the inherent tension between safeguarding democratic deliverance of justice and urgent demands for ethical governance. Unless the Joint Parliamentary Committee (JPC) carefully recalibrates to incorporate due process and institutional checks – the Bill is with the JPC – it could transmute constitutional safeguards into instruments of political exclusion, testing the delicate balance of India's democratic experiment. For, in the long run, power without integrity corrodes democracy, and integrity without fairness endangers it.

Nourish to flourish, the nutrition and cognition link

Imagine that you have a flight to catch at 2 p.m. Given the factors such as the distance to travel, the traffic conditions, and airport check-in time, you are likely to miss the flight unless you leave your house at 12 p.m. The hour between 12 p.m. and 1 p.m. is your critical window to make sure that you catch the flight. Similarly, for a child, the first 1,000 days of his life are that critical window – a once-in-a-lifetime opportunity to lay the foundation for future success. Brain development and maturation as well as adequate growth through nutrition must happen in this period, failing which the child will never reach their full potential.

What the science says

The science is undeniable. By the age of two years, the brain reaches almost 80% of its adult weight. Synapse development peaks during this time, with synaptic density reaching adult levels by preschool age. The development of the frontal lobes, which are believed to control higher cognitive functions (including planning, sequencing and self-regulation), happens in growth spurts during the first two years of life. If the foundational development of the brain and skills is flawed in these earliest days, later developments that build on earlier circuits and skills will be inherently limited.

It is not just cognitive development that is defined in the first 1,000 days. Nutritional deficiencies before the age of three are, in some cases, impossible to reverse. Although India has made strides in overcoming nutritional deficiencies in the decades between 1993 and 2021, at the current rate of decline, stunting prevalence (low height for age) will reach 10% only by 2075. Can we double the pace to hit this target by 2047? To succeed, we must seize the critical window of early childhood by combining efforts on nutrition and cognition, giving children the best chance at a bright future.

Nina Badgaiyan

is Senior Public Health Expert (Consultant) at the Asian Development Bank

Namya Mahajan

is Co-founder at Rocket Learning

Nutrition and cognitive development have to go hand in hand. They are, for all intents and purposes, cut from the same cloth. Adequate nutrition is essential for brain function, and without meeting nutritional demands, there can be permanent cognitive damage or disabilities. A birth-cohort study in Vellore, Tamil Nadu, found that early childhood iron deficiency negatively impacts verbal performance and cognitive processing speed at age five and affects expressive language development before the age of two. Research has also indicated that the impact of stand-alone nutrition programmes was low to moderate when compared to combined nutrition and stimulation programmes. Learning is fast and permanent in the first few years. A three-year-old starts speaking in a regional language and never forgets it. Most of us still remember nursery rhymes, thanks to neuroplasticity.

Childcare programmes in India

The Integrated Child Development Services (ICDS) programme, one of the biggest childcare programmes in the world, has the unique ability to prioritise both nutrition and education as pillars of early childhood development. The Ministry of Women and Child Development has launched programmes such as "Poshan Bhi Padhai Bhi", which seek to ensure that nutrition and cognitive development go hand in hand.

Additionally, the National Framework for Early Childhood Stimulation for Children from Birth to Three Years - Navchetana provides structured guidance in the form of simple activities for social and cognitive stimulation based on the age of the child. The framework offers 140 activities tailored to the child's age, presented in a 36-month stimulation activity calendar. It is designed to be used by parents, caregivers and Anganwadi or crèche workers, particularly during home visits. These provide an opportunity to learn through play-based activities supported by caregivers,

For a child, the first 1,000 days of his life are a critical window to lay the foundation for his future; more needs to be done in India

rather than being 'taught' in a formal sense. Well-conducted home visits using the stimulation calendar will help children under the age of three receive adequate, timely, and nutrient-rich food to support their holistic development and reduce the risk of developmental delays due to nutritional deficits.

Areas that need improvement

Though an army of almost 14 lakh Anganwadi centres and workers is at the frontlines of the battle to ensure that children get adequate nutrition and stimulation, especially in the first 1,000 days, more needs to be done. The ICDS programme needs to enhance its coverage and achieve saturation of its target populations with high-quality services in health, nutrition and early learning. It needs to leverage advancements in technology, expand and enhance services in urban areas, and improve the access, capacity and delivery of pre-primary education, including evaluation and measurement of the health, learning and psychosocial well-being of children under six years.

Finally, to empower women to join the productive workforce, we need to expand the crèche provision by exploring multiple models including publicly-run, community-run and public-private partnerships.

We must remember we are what we eat and what we think – and what is lost in the early years can never be regained. Investing in early childhood nutrition and stimulation is not just about health. It is about empowering children and women to reach their full potential and meeting the evolving needs of society.

Investments in early childhood and investment are particularly urgent as we progress towards increased automation, mechanisation and an accelerated pace of technological advancement, which is likely to lead to less employment for low-skilled and unskilled workers.

LETTERS TO THE EDITOR

Crisis in the hills

The recent cases of flood-related disasters in Himachal Pradesh and Uttarakhand, which include flash floods, cloudbursts and landslides, demand urgent attention. The great damage being caused is a warning sign of converging environmental and developmental missteps. These are States that are the indicators of ecological

health. What is worrying is the frequency and the severity of these events.

The ASI is facing a credibility crisis

The Archaeological Survey of India (ASI) has once again drawn public scrutiny following the controversial transfer of archaeologist K. Amarnath Ramakrishna. His leadership of the Keeladi excavation in Tamil Nadu garnered considerable public and academic interest in the history of ancient Tamil civilisation.

The Keeladi excavations
Started in 2014, the excavation at Keeladi uncovered around 7,500 artefacts. The findings indicated the presence of a sophisticated, literate, and secular urban society and offered crucial evidence in bridging the historical gap between the Iron Age (12th-6th century BCE) and the Early Historic Period (6th-4th century BCE). Scholars have since referred to the site as part of the Vaigai Valley Civilisation. The Keeladi settlement could be a part of the second urbanisation that swept the Indian subcontinent between the 6th and 2nd centuries BCE.

The project took a dramatic turn when Mr. Ramakrishna was abruptly transferred to Assam in 2017. His transfer was widely perceived as an effort to downplay the findings. Tensions escalated when the ASI claimed there were no significant findings and halted the third phase of excavation. This sparked a political rift between the Tamil Nadu government and the Union government. The Madras High Court intervened, transferring the site to the Tamil Nadu State Department of Archaeology, which has since unearthed over 18,000 artefacts.

In 2021, Mr. Ramakrishna returned to Tamil Nadu as superintending archaeologist of the Chennai circle. In 2023, he submitted a report on the first two phases, substantiating the earlier findings. However, the ASI requested a revision of the report. Defending his conclusions, Mr. Ramakrishna cited methodological rigour, stratigraphic sequencing, material

Swarati Sabhapandit

Research scholar

C.P. Rajendran

Adjunct Professor at the National Institute of Advanced Sciences, Bengaluru

culture analysis, and Accelerator Mass Spectrometry dating of the carbonaceous material retrieved from various event horizons within the excavated sites. The episodes underscore the politics in archaeological practice and reflect a credibility crisis facing the ASI.

An inconsistent approach

The Union government justified its stance saying a single set of findings cannot substantiate alternative historical narratives without broader scientific validation. While this rationale champions methodological rigour and scientific inquiry in knowledge production, it also exposes the inconsistency in the ASI's conduct across other excavation projects.

Excavations at the Adichanallur and Sivagalai sites in the Thoothukudi district of Tamil Nadu exhibited a pattern similar to Keeladi. Although Adichanallur was excavated in the early 20th century by a British archaeologist, Alexander Rea, the site was neglected for nearly a century. When excavations resumed under the leadership of T. Sathyamurthy of ASI in 2004, notable Iron Age artefacts were uncovered, dated to be more than 3,000 years old. However, it took more than 15 years and court intervention for the ASI to publish the findings.

However, the ASI's excavation in Rajasthan assumed a different trajectory. The unearthing of an ancient 23 m-deep paleochannel in Bahaj village prompted some historians and archaeologists to associate the site with the mythical Saraswati River mentioned in the Rig Veda. The excavation report also claimed links to human settlements from the 'Mahabharata period', a controversial time interval debated by scholars. Such uncritical embrace of mytho-historical narratives stands antithetical to the principles of scientific knowledge production.

The ASI's conduct in these instances reveals a trap of methodological nationalism – a

framework privileging a singular, state-sanctioned vision of India's past. This approach is often legitimised through methodological rigidity, teleological interpretations, and the construction of a monopolised epistemic regime. The institution's pursuit of portraying India as a civilisational monolith has long drawn criticism from scholarly circles. Ashish Avikunthak (2021) highlighted arbitrary transfers, delayed promotions, exasperating work conditions, and inadequate infrastructure that stifle quality work in the ASI. Supriya Verma and Jaya Menon (2003) critiqued the Ayodhya excavation project for lacking scientific integrity. Jürgen Neuf (2012) and Dilip Kumar Chakrabarti (1988, 2003) pointed to the ASI's continued reliance on the outdated Wheeler method and the lack of comprehensive research designs as impediments to holistic interpretation.

The ASI has largely retained a closed internal review system. Most research is circulated through internal reports, institutional monographs, and bulletins. In contrast, its global counterparts such as the Deutsches Archäologisches Institut in Germany, the Institut National de Recherches Archéologiques Préventives in France, and Japan's Agency for Cultural Affairs regularly publish findings in academic platforms. This fosters transparency, methodological accountability, scholarly rigour, and enhance the accessibility of archaeological findings. It also invites global scholarly engagement.

Beyond these issues, the ASI's epistemic endeavour is increasingly subsumed by nationalistic fervour. The crumbling legitimacy of archaeological enterprise calls for comprehensive structural and institutional reforms, greater methodological and scientific rigour, financial autonomy, and a robust epistemic framework that embraces the plurality of India's historical past.

Beyond the erosion of its institutional autonomy amid bureaucratic entanglement and political contingencies, the ASI's epistemic endeavour is increasingly subsumed by nationalistic fervour

Indians least concerned about the global economy: PEW survey

Only 49% of Indians said they were worried about the global economy; this was the lowest share among the 25 nations surveyed

DATA POINT

The Hindu Data Team

A 2025 survey by the Pew Research Center shows that among the people of 25 countries asked about perceived global threats, Indians were among the least concerned the condition of the world economy and climate change. Only about half the Indians surveyed viewed these as major threats. In contrast, nearly 80% of Indians identified terrorism as a major concern – one of the highest shares.

The Pew survey was carried out between March 24 and 30, 2025. Comparable data is drawn from Pew studies conducted in 2013, 2016, 2017, 2018, 2020, and 2022. Conclusions for nine advanced economies – Australia, Canada, France, Germany, Italy, Japan, Spain, the U.K. and the U.S. – were also presented separately in the survey of 25 countries.

The findings show that spread of false information online has overtaken the global economy and climate change as the biggest perceived threat. It continues to be seen as a major concern by a majority in the 25 countries, including the nine advanced economies.

In the spring 2025 survey, a median of 72% of adults across 25 countries said the spread of false information online poses a major threat to their nation. Another 21% considered it a minor threat, while only 5% said it was not a threat at all (Chart 1). In seven countries – Germany, the Netherlands, Poland, Sweden, the U.K., the U.S., and South Korea – the spread of false information was seen as a greater threat than any other issue in the survey.

For the first time since 2017, adults in nine advanced economies viewed the state of the global economy as a bigger threat than climate change (Chart 2). This shift carries important implications at a time when nations are

under pressure to curb fossil fuel use and lower carbon emissions. It also reveals the public mood, shaped by anxieties over slowing growth – whether real or perceived – amid rising U.S. tariff pressures and the disruptions of two ongoing wars.

In the survey, a median of 70% of adults across the surveyed countries considered the state of the global economy a major threat. In Japan, Greece and Australia, the global economy was seen as a greater threat than all other issues.

A median of 67% of adults across the surveyed countries said global climate change was a major threat. Another 24% said it is a minor threat; 9% said it poses no threat at all. In no country surveyed was climate change considered the single greatest threat. As in past surveys, people on the ideological left remained more concerned about climate change than those on the right.

Across 25 countries, a median of 69% of adults said terrorism is a major threat, while 26% called it a minor one and 6% said it was no threat. In India, Israel, Nigeria, and Turkey, terrorism ranked as the top concern among the five issues. People in middle-income countries were more likely than those in high-income countries to view terrorism as a major threat (79% median versus 60%). Concern about the issue was also higher among older adults, those less educated, and those on the ideological right, including supporters of right-leaning populist parties.

While 49% of Indians saw the global economy as a major threat, 55% saw climate change as a major threat. This was among the lowest shares in the respective categories. By contrast, 79% of Indians said they consider terrorism a major threat (Table 3). Close to 70% each considered false online information and infectious diseases as a threat. In Argentina, Brazil, South Africa, and Mexico, infectious diseases were seen as the top threat among the five issues surveyed.

Cause for concern

The data for the charts were sourced from a survey conducted by the Pew Research Center titled 'International Opinion on Global Threats'

The spread of false information online
The condition of the global economy
Terrorism
Global climate change
The spread of infectious diseases

Chart 1: Median % who said each of the following is (a) to their country. Around 7 in 10 adults across the 25 nations surveyed viewed false information online, the state of the global economy, and terrorism as major threats

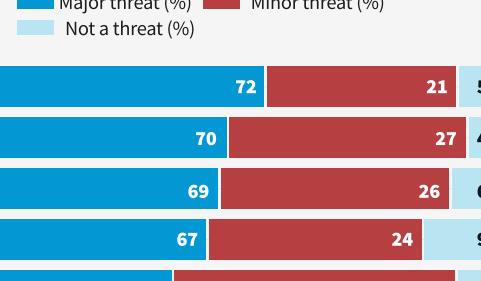

Chart 3: Country-wise share of respondents who said each of the following is a major threat to their country (in %)

Country	Spread of false information online	Condition of the global economy	Terrorism	Global climate change	Spread of infectious diseases
Brazil	84	77	77	77	91
Kenya	75	81	89	72	88
Turkey	66	79	91	87	87

Vijay cannot bank on star power alone

Building organisational strength and meeting people are important

STATE OF PLAY

B. Kolappan

kolappan.b@thehindu.co.in

Tamil Nadu
Vijay belongs to a different era, and all the factors that dominated Tamil Nadu in the past need not become decisive now. But Mr. Vijay also lives in an ivory tower. He projects himself as a saviour of the people of Tamil Nadu and his party as an alternative to other political parties, but refuses to meet the media and refrains from reacting to vital issues.

When a protest against the Greater Chennai Corporation's decision to outsource waste management led to the detention of over 800 workers at midnight earlier this month, all the leaders in the State visited the workers. However, Mr. Vijay invited them to his house. Perhaps he thought that his visit would cause a stampede given his massive popularity, but the decision did him no favours.

There are a few factors that may benefit him. There is a clear lack of cohesiveness in the AIADMK, and the DMK faces anti-incumbency. Mr. Vijay has also said that he would be open to forming an alliance and sharing power with other parties. However, he cannot merely hope to take advantage of the anti-incumbency factor; he will need to split the DMK votes and receive substantial votes from the AIADMK to make a mark in 2026. Chief Minister M.K. Stalin has converted the alliance into what looks like a family and no party has shown any indication of leaving the DMK-led alliance.

A strong organisation is also essential for success in politics and matters more than image. When MGR formed the AIADMK, a substantial part of the DMK, which had strong organisational strength and experienced leaders, went with him. Even in the case of Jayalalithaa, who was a popular actor and a protégé of MGR, it was the AIADMK's strong organisational base that helped her sustain herself in politics. Elections have proved that she, unlike MGR, was not invincible in politics. Conversely, it was lack of organisational strength that reduced actor Kamal Haasan's political party, Makkal Needhi Maiam, into an appendage of the DMK. Some may argue that Mr.

Some may argue that Mr.

NCERT wants change in mode of evaluation

New Delhi, Aug. 24: The approach paper, prepared by the National Council of Educational Research and Training (NCERT) on the curriculum for the 10-year school, has suggested that a public examination at the end of 10 years of schooling should be abolished.

The schools' assessment in each subject or unit should be placed on record and given to students. A record of internal assessment covering both scholastic and non-scholastic areas without an aggregate should be included in the school certificate, which should not only mention the student's evaluation in subjects, but also in co-curricular and other areas of character and personality.

The paper has emphasised that evaluation properly practised will influence teacher's methods and the study habits of pupils. Emphasis on the assessment of understanding, application and problem solving is bound to influence instruction positively. Use of improved type of questions is a real need to dissuade pupils from resorting to rote learning.

The main purpose of valuation, according to the NCERT, is to see how far the objectives set forth to be achieved through the curriculum have been realised. This process is naturally related to the learning experiences and methods of teaching that have been used in the process of instruction and learning.

Evaluation, in order to be used, says the NCERT, has to possess the following characteristics: it should give reliable and concrete evidence on the attainment of specific objectives; and it has to be comprehensive, covering all objectives and content areas in a particular course.

A HUNDRED YEARS AGO AUGUST 25, 1925

Raw cotton

(From the Department of Agriculture)

The receipts of loose cotton at presses and spinning mills in the Madras Presidency, from the 1st February to the 15th August, amounted to 4,53,467 bales of 400 lb. lint, against an estimate of 552,700 bales of the total crop of 1924-1925. The receipts in the corresponding period of the previous year were 356,578 bales: 105,443 bales mainly of pressed cotton were received at spinning mills and 253,575 bales were exported by sea while 3,293 bales were imported by sea mainly from Bombay.

How have deception techniques evolved?

What are AI-enabled X-Guard Fibre-Optic Towed Decoy systems? What are some other systems comparable to the X-Guards? How has Ukraine deployed decoys in its war against Russia? Do navies also employ countermeasures to protect warships? How has India fared with deception decoys?

EXPLAINER

Rahul Bedi

The story so far: In contemporary warfare, deception has evolved alongside the increasing precision and lethality of modern weaponry. As combat platforms – from fighter jets and tanks to warships – become more sophisticated, so too have techniques developed to shield them from detection and attack. Over the decades, the traditional art of battlefield trickery has merged with digital-age innovations, incorporating decoys and countermeasures designed to confuse, mislead, or overwhelm enemy sensors and targeting systems. By creating doubt and sowing confusion, these decoys not only waste enemy munitions but also buy crucial time for the actual platform to evade or retaliate. Hence, decoys turn deception into a strategic asset as critical as firepower.

How has India deployed decoys? During Operation Sindoos, the Indian Air Force (IAF) is believed to have successfully deployed the AI-enabled X-Guard Fibre-Optic Towed Decoy (FOTD) system – developed by Israel's Rafael – on its Rafale fighters as part of their electronic warfare (EW) suite. Although neither the IAF nor official sources have confirmed the use of X-Guard, former U.S. F-15 pilot Ryan Bodenheimer told Indian media outlets that it was “the best instance of spoofing and deception ever seen.” Confusion persists over how many, if any, Rafales were actually lost in a May 7 strike on Islamist camps inside Pakistan. The Pakistan Air Force (PAF) may have downed several X-Guard decoys – trailing about 100 metres behind each aircraft – misidentifying them as real targets.

Analysts believe the PAF's Chinese-origin J-10C fighters, armed with PL-15E beyond-visual-range air-to-air missiles, struggled to distinguish between the decoys and actual aircraft. Several

New forms: The INS Karanj submarine is equipped with a state-of-the-art torpedo decoy system. INS Karanj can launch marine commandos for special operations behind enemy lines. FILE PHOTO

missiles reportedly locked onto the X-Guards instead, leading PAF pilots to prematurely claim multiple shootdowns.

How does the FOTD system work? Acquired via classified channels, the lightweight (30 kg), retractable, and reusable X-Guard mimics the Rafale's Radar Cross-Section (RCS), doppler velocity, and spectral signature across multiple radar bands. It can also replicate the Rafale's onboard electronic countermeasures – creating a convincing illusion for both human operators and tracking systems.

Its 360-degree jamming signal capability integrates seamlessly with the Rafale's SPECTRA (Self-Protection Equipment Countering Threats to Rafale Aircraft) EW suite. While SPECTRA manages threat detection, blocking, and onboard defensive measures, the X-Guard

adds a trailing expendable layer, jointly forming a multi-tiered defensive shield. Following Operation Sindoos, the IAF is reportedly fast-tracking additional X-Guard unit acquisitions via the emergency procurement route recently approved by the Ministry of Defence.

Comparable systems include Leonardo UL's BriteCloud, deployed on Eurofighter Typhoons, Sweden's Gripen-Es, and certain F-16 variants; and the AN/ALE-50/55 series from Raytheon/BAE Systems used on the F/A-18E/F Super Hornet. Some of these systems can also be adapted for use on unmanned aerial vehicles such as on Israeli Herons or U.S.-origin MQ-9 Reapers, albeit with onboard signal processing and remote deployment modifications.

What about land-based decoys? Ground forces too have long relied on

decoys to mislead enemy Intelligence, Surveillance, Reconnaissance (ISR) assets and divert precision-guided weapons. Inflatable, radar-reflective, and heat-emitting dummy systems simulating tanks, artillery, missile batteries, and command posts are regularly deployed to bait strikes. From the 1991 Gulf War to the ongoing Ukraine conflict, such decoys have absorbed expensive munitions and disrupted offensive momentum.

With drones and loitering munitions saturating modern battlefields, these ground decoys have become increasingly sophisticated. Russia's Inflatech decoys can simulate entire armoured formations within minutes. Ukraine has deployed wooden and 3D-printed fakes to exhaust Russian drone and missile stocks. The U.S. Army too has trialled decoy vehicles to fool top-attack weapons like Javelin anti-tank guided missiles. China has also invested in camouflage and deception technologies across its ground forces.

In April 2025, the Indian Army issued a request for information to domestic vendors seeking physical decoys of its Russian-origin T-90S/SK main battle tanks to replicate not just its dimensions, but also its thermal and acoustic signatures to deceive enemy drones and munitions.

Navies too employ a layered suite of countermeasures, ranging from floating chaff and acoustic decoys to offboard active deception systems, to protect warships from missile and submarine threats. Among the most effective is the self-propelled Nulka active missile decoy, jointly developed by Australia and the U.S., that operates independently of its launch platform and mimics the radar signature of a much larger vessel, drawing radar-guided missiles away from their real target.

Ultimately, decoys – across air, land, and sea – have become indispensable to modern warfighting. For a relatively low investment, they deliver high-impact protection.

Rahul Bedi is a journalist based in New Delhi and Chandigarh specialising in military, defence and security matters.

What is the new Bill to remove PM, CM and Ministers?

What does the 130th Constitutional Amendment Bill state? Is there scope for misuse?

Rangarajan R

The story so far:

The Union government has introduced the 130th Constitutional Amendment Bill, under which a Minister will be removed from office if they are arrested and detained for 30 days in relation to a criminal offence.

What does the Bill say?

The Bill seeks to amend Articles 75 and 164 of the Constitution that deal with the Council of Ministers at the Union and State level. It provides that a Minister, who has been arrested and detained for 30 consecutive days in relation to an allegation of committing an offence, which is punishable with imprisonment of at least five years, shall be removed from his/her office. They would be removed on the advice tendered by the Prime Minister/Chief Minister (PM/CM). If

the PM/CM does not tender such advice, the Minister concerned shall automatically cease to hold office from the 31st day. If the PM/CM is arrested and taken into custody for 30 consecutive days, he/she shall tender his/her resignation on the 31st day. However, the PM, CM, or Minister can be subsequently appointed on being released from custody. It also seeks to amend Article 239AA with similar provisions for the National Capital Territory of Delhi. These amendments to the Constitution would require a two-thirds majority in both houses of Parliament for its passage. Similar amendments have been proposed to parliamentary laws that govern the Union Territories of Jammu & Kashmir and Puducherry. These Bills have been referred to a Joint Parliamentary Committee (JPC) for scrutiny.

What are the existing laws? The Representation of the People Act,

1951 (RP Act) provides that any person who is convicted in a criminal case and sentenced to not less than two years in jail, shall be disqualified from being a member of Parliament or State legislature for the period of their sentence and six years thereafter. Section 8(4) of the RP Act provided that with respect to a sitting member of Parliament or State legislature, such disqualification shall not take effect if an appeal is filed against such conviction. However, the Supreme Court in *Lily Thomas* (2013) struck down this clause as unconstitutional. It must be noted that the existing law only provides for disqualification for being a member of Parliament or State Legislature and not for being a minister.

In 2016, the Election Commission had recommended that the RP Act be amended to provide that persons against whom charges are framed by a competent court for an offence that is punishable with imprisonment of at least five years

be barred from contesting elections.

THE GIST

What are the issues? Firstly, it will result in elected representatives losing their position by mere police action even before the start of a trial. Secondly, it undermines the principles of parliamentary democracy where the elected PM, CM enjoys the power to choose their cabinet. Finally, it gives the Centre disproportionate power to initiate vindictive action against ministers in opposition-ruled States.

What should be done?

Criminalisation of politics is a malaise plaguing our democratic system. However, the issues surrounding the Bill need careful consideration.

Moreover, the Bill seems to try to address the effect than the cause. Reports by the Association of Democratic Reforms states that 46% of MPs and 45% of MLAs have criminal cases against them. It added that the chances of winning for a candidate with a criminal background was 15.4% as against just 4.4% for a candidate with a clean background. An appropriate step then would be to not field candidates who have criminal records. Parties should instil this self-discipline rather than provide tickets to tainted candidates on the ground of ‘winnability’.

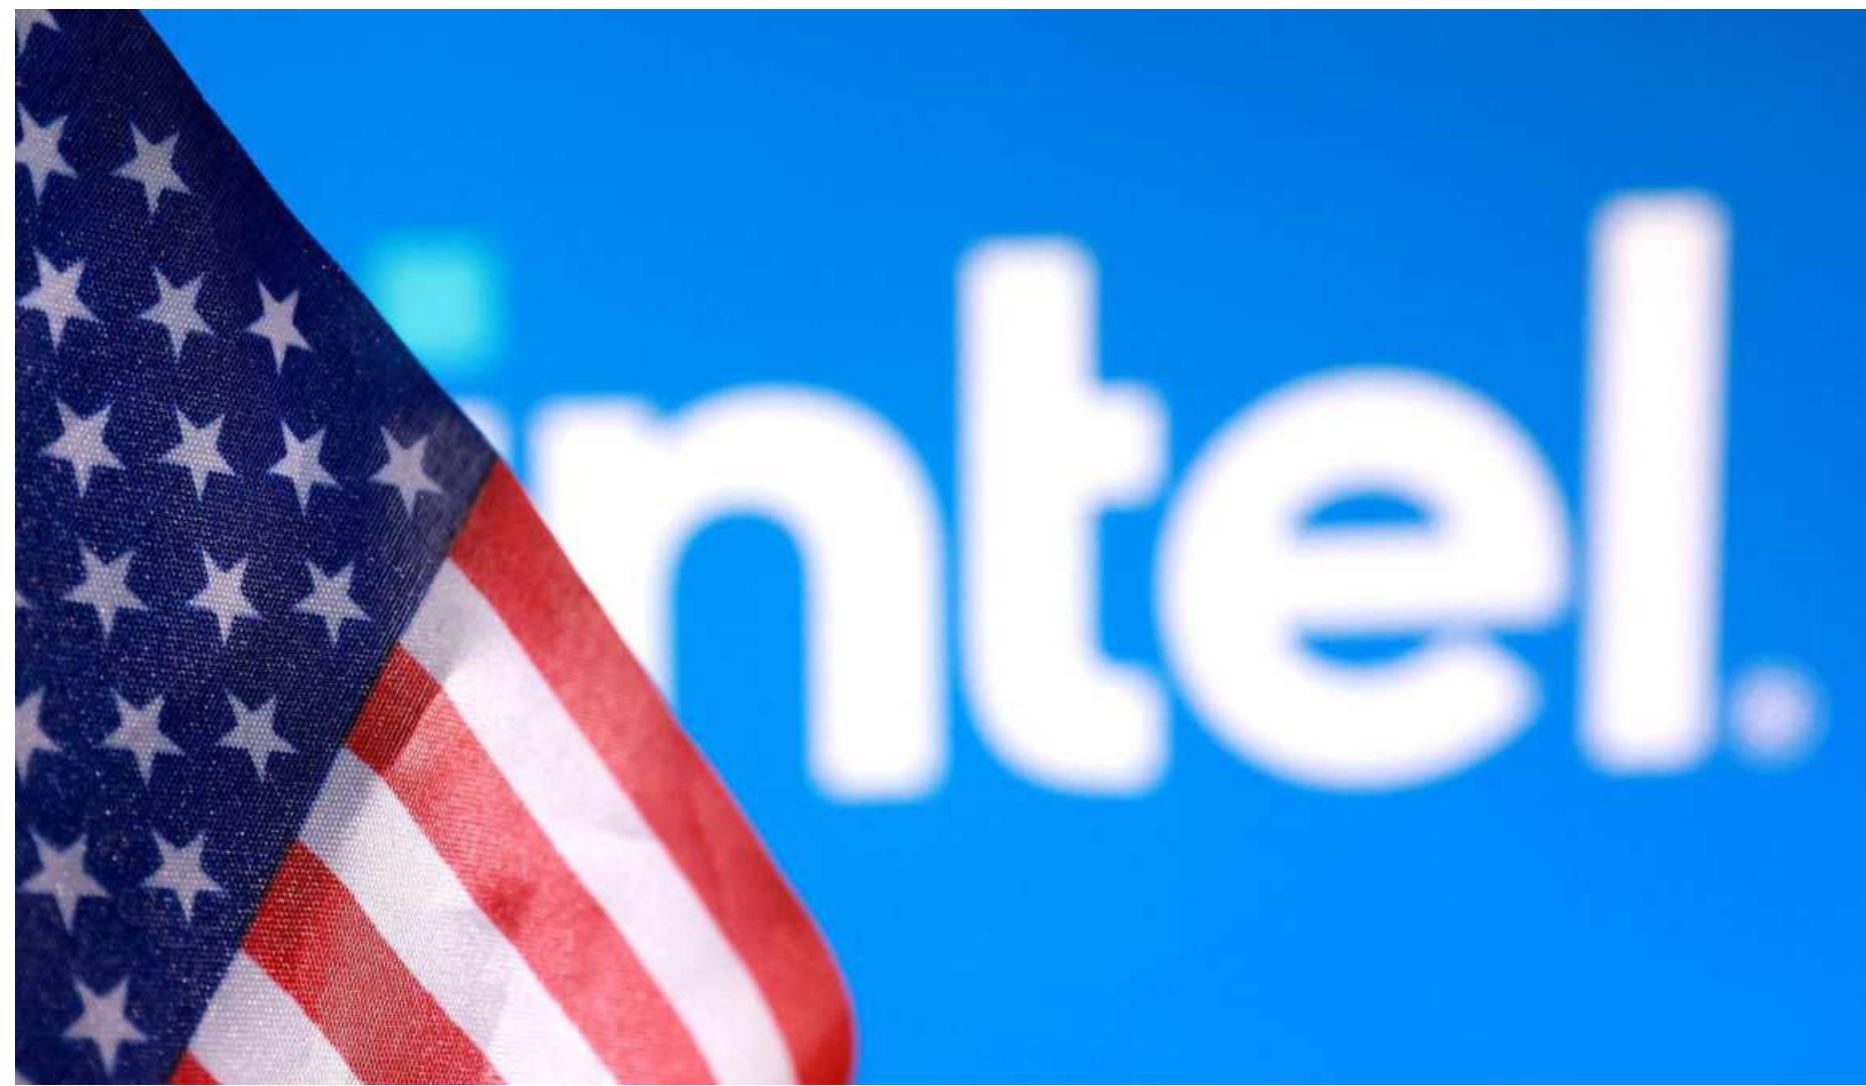

Rangarajan R is a former IAS officer and author of ‘Cowware on Polity Simplified’.

Trump's Intel deal: how the U.S. is reinventing state capitalism

Washington's deal to take a nearly 10% stake in Intel is more than just a bailout for the struggling chipmaker; it is a striking symbol of a new era in American economic policy, one that bears an uncomfortable resemblance to European state capitalism of the 1960s

John Xavier

For decades, U.S. politicians have looked across the Atlantic at Europe's experiments with state-directed industry with a mixture of pity and scorn. The French model of *dirigisme*, with its state-owned champions and politically guided investments, was often held up as a cautionary tale of bureaucratic meddling and economic sclerosis.

Yet, in a move that turns decades of free-market economics on its head, the U.S. government is now a leading shareholder in one of Silicon Valley's founding giants. The agreement for Washington to take a nearly 10% stake in Intel is more than just a bailout for a struggling chipmaker; it is a striking symbol of a new era in American economic policy, one that bears an uncomfortable resemblance to the European state capitalism of the 1960s.

Uneasy alliances

The deal itself, announced by President Donald Trump, is an extraordinary piece of political theatre and financial engineering. The 10% stake in Intel will not be funded by new money, but through a clever conversion of funds already allocated to the chipmaker through the 2022 CHIPS and Science Act, which was designed to bolster domestic semiconductor manufacturing.

The current arrangement with Intel was born of a hurried rapprochement between the President and Intel's chief executive, Lio-Bu Tan. Mr. Trump had

previously called for Mr. Tan's resignation over his prior investments in Chinese start-ups. After a meeting, however, the President's tone changed dramatically. It is a transactional, almost improvisational, approach to industrial strategy that has become a hallmark of the administration.

"I said, I think you should pay us 10% of your company. And they said 'yes' – that is about \$10 billion," Mr. Trump told about his interaction with Intel during an Oval Office press briefing on Friday. "He walked in wanting to keep his job, and he ended up giving us \$10 billion for the U.S." Mr. Trump said.

This is not Mr. Trump's isolated venture. The White House has struck other unusual deals, including allowing Nvidia and AMD to sell certain AI processors to China on the condition that Washington receives a portion of the revenue. The Intel deal, however, marks the most significant direct equity stake in a major technology firm, prompting Mr. Trump to declare, "We do a lot of deals like that: I'll do more of them."

The parallel with 1960s Europe is compelling. Back then, governments in countries like France and Britain, alarmed by what was dubbed the "technology gap" with America, poured public money into creating "national champions" in strategic sectors such as computers and aerospace. The belief was that only the state had the deep pockets and long-term vision to build companies that could compete on a global scale. These policies, however, were largely unsuccessful, often resulting in uncompetitive, state-coddled firms that

drained taxpayer funds and lagged in innovation.

Intel, once the undisputed king of semiconductors, now finds itself in a position that makes it a candidate for such state intervention. The company has been haemorrhaging money, posting a staggering operating loss in 2024, and has fallen technologically behind rivals like Taiwan's TSMC. Its struggles to attract external customers for its manufacturing arm, and delays in construction plans in States like Ohio have cast doubt on its turnaround strategy. This weakness made Intel uniquely receptive to Washington's offer. Foreign competitors like TSMC and Samsung, which are also building factories in the U.S. with CHIPS Act subsidies, are far too successful and valuable to entertain ceding a significant equity stake to Uncle Sam.

So, this is not a case of the government picking a winner, but of preventing a national icon – and a critical node in the domestic semiconductor supply chain – from falling further into irrelevance.

A new kind of state intervention
However, there is a crucial distinction between this new American interventionism and its European precursor. The government's investment is structured as a passive, non-voting ownership stake. Washington will have no seat on the board and no formal governance rights, and has agreed to vote with the company's board on most shareholder matters.

This suggests a more sophisticated model than the heavy-handed state

control of the past. The goal appears to be to provide vital capital and a government seal of approval, ensuring the taxpayer shares in any potential upside from a successful turnaround, without succumbing to the temptation of political meddling in day-to-day operations.

Nonetheless, the risks are profound. The line between a passive partner and an influential stakeholder can blur, especially if Intel's troubles persist. Future administrations may not share the current hands-off approach. The government is now financially exposed to Intel's performance, creating a dangerous precedent where corporate failures in strategic sectors become direct liabilities for the public purse. This move fundamentally alters the relationship between the state and private enterprise in a way that could introduce new and unpredictable forms of political and market risk.

The U.S.'s foray into shareholder activism is a reluctant one, born not of ideological conviction but of geopolitical necessity and fierce technological rivalry with China. The long-held belief in the inherent superiority of the free market is giving way to a pragmatic, if uneasy, embrace of industrial policy.

The Intel stake is a bold experiment in this new reality. The critical question is whether the U.S. can learn from Europe's past, deploying the power of the state to nurture a strategic industry without smothering the competitive spirit that made it a world leader in the first place. The American taxpayer now has \$10 billion riding on the answer.

KNOW YOUR ENGLISH

Her articles are always full of factoids

Don't be so sure of the promotion.
There is many a slip between the cup and the lip

S. Upendran

What is the difference between 'fact' and 'factoid'? (L. Sudharshan, Nagpur)

The famous American author, Norman Mailer, is believed to have coined and used 'factoid' in his book on Marilyn Monroe written in the early 1970s. While a 'fact' can be verified, a 'factoid' cannot be. Mailer defines his new word as 'facts which have no existence before appearing in a magazine or a newspaper, creations which are not so much lies, as a product to manipulate the silent majority.' In other words, the original meaning of factoid was an unsubstantiated statement that is often presented as a fact in print. Over the years, the meaning of the word has gradually changed. A factoid no longer needs to be a printed statement; it can be spoken. It is a questionable statement that people are brainwashed into believing as being true because of the constant repetition in the media. Many of our politicians' speeches, for example, are laced with factoids rather than facts. Nowadays, the word is also used to mean a 'trivial fact' – an interesting piece of information which is of no significance.

Sashi wastes nearly four hours every day looking for insignificant factoids.

The statement that everyone in America owns a car is a factoid.

As far as the pronunciation is concerned, the first syllable is like the word 'fact', and the following 'oid' is pronounced like the 'oid' in 'avoid', 'devoid' and 'steroid'. The word is pronounced 'FAC-toid' with the stress is on the first syllable.

What is the meaning and origin of 'there's many a slip 'twixt the cup and the lip'? (Sankara Narayana, Hyderabad)

The word 'twixt' is the short form of 'betwixt' meaning 'between'; in fact, nowadays, many people prefer to say, 'many a slip between the cup and the lip'. This relatively old expression is mostly used to caution someone not to become overconfident about an enterprise. Although everything looks rosy right now, and success seems within reach, something unexpected may happen and ruin everything – the project may end up being a disaster and if it is a game, you might end up losing it. As our cricket commentators frequently say, you might end up snatching defeat from the jaws of victory!

The actors were certain that the shooting would go according to plan. The Director, however, cautioned them that there was many a slip between the cup and the lip. An hour later, it started pouring.

Sinner is the favourite to win the tournament, but there's many a slip twixt the cup and the lip.

THE DAILY QUIZ

A quiz on Uruguay on the 200th anniversary of the declaration of its independence

V.V. Ramanan

QUESTION 1

Name the revolutionary group, led by Juan Antonio Lavalleja and Manuel Oribe, whose actions against Brazil ended in the foundation of modern Uruguay.

QUESTION 2

Apart from Brazil, with which other nation does Uruguay share its border?

QUESTION 3

What is the 'Orientales, la Patria la Tumba' and why is it in the Guinness World Records?

QUESTION 4

In 2013, Uruguay became the first country in the world to fully legalise what controversial

industry?

QUESTION 5

The 'Maracanazo' is part of the football lore of the two-time FIFA World Cup-winning nation. What is 'Maracanazo'?

QUESTION 6

The name of the country is believed to originate from the Guarani language for the main waterbody. What does it mean?

QUESTION 7

Known for its strong secular tradition, what is Christmas Day officially called in Uruguay?

QUESTION 8

What is the traditional plant-extracted drink often consumed from a hollow gourd with a metal straw called?

Visual question:

Name this legendary footballer who won the 'Golden Ball' for the best player of the 2010 World Cup. AFP

Questions and Answers to the August 22 edition of the daily quiz: 1. In 1989, this landmark decision led to a sudden increase in the number of voters in India.

Ans: To lower the voting age from 21 to 18

2. According to the Constitution, the CEC can only be removed from office in the same manner as _____. Ans: Supreme Court judge

3. January 25 is observed as this. Ans: National Voters' Day

4. X is an independent verification printer machine and is attached to electronic voting machines. Ans: Voter Verified Paper Audit Trail (VVPAT)

5. In the ongoing SIR exercise in Bihar, this document was not accepted by the EC as proof until the Supreme Court directed the body to accept it. Ans: Aadhaar

Visual: This person designed the logo of the EC. Ans: Amitabh Pandey

Early Birds: Sudhir Thapa| Aditi Anandita| Navjot Singh| Saheni George| Vikash Kumar

Word of the day

Frigid:

extremely cold; devoid of warmth and cordiality; expressive of unfriendliness or disdain

Synonyms: arctic, glacial, icy, frosty, cold

Usage: She welcomed him with a very frigid greeting.

Pronunciation: newsth.live/frigidpro

International Phonetic Alphabet: /frɪdʒɪd/

From Page One**'98.2% Bihar voters have submitted documents'**

The SIR was done between June 24 and July 25. Claims and objections along with documents can be submitted till September 1.

The poll panel appreciated the efforts by the Chief Electoral Officer of Bihar, District Election Officers of all 38 districts, 243 EROs, 2,976 AEROS, 90,712 booth-level officers, lakhs of volunteers and field representatives of all the 12 major political parties, and their 1.6 lakh booth-level agents.

"The exercise to collect their documents with the help of BLOs and volunteers is going on. Thus, just like collection of enumeration forms, work related to collection of documents is also likely to be completed before time," the release said, adding that verification of documents is also being done concurrently by the EROs and the AEROS.

The poll body said that out of 7.24 crore electors in the draft rolls, only 0.16% of the voters have filed claims and objections so far. "10 from the BLAs of 12 recognised political parties in Bihar, NIL by persons who are not electors of that Assembly Constituency and 1,21,43 by electors within their Assembly Constituency," the press note said.

Aadhaar alone is not valid proof, claims BJP

The party said Aadhaar alone could not be a valid document for enrolling as a voter. "Attributing to the Supreme Court what it has not said is contempt of court," said BJP national secretary and IT cell head Amit Malviya.

"Aadhaar is only a proof of identity and residence and it does not establish citizenship," Mr. Malviya said, adding that the Aadhaar Act said so. He said nowhere in the judgment did the Supreme Court even suggest that it should be used as a valid document for the SIR.

'Spreading propaganda'

"The Opposition is spreading propaganda over the issue," he said. The Representation of the People Act states that a person will be disqualified from registration on electoral rolls if he is not a citizen of India, declared by a competent court to be of unsound mind or is disqualified under law relating to corrupt practices or offences in elections, Mr. Malviya said.

"Asking the Election Commission to include Aadhaar as a document for automatic voter enrolment would render Section 16 of the Representation of the People Act and the Aadhaar Act meaningless. In fact, this very Bench, on August 12, held that Aadhaar is not a legal document to prove citizenship," Mr. Malviya said.

"The truth is simple: SIR is intact, Aadhaar alone cannot get you enrolled; dead, fake, Bangladeshi and Rohingya names will be removed and only Indian citizens will elect the next government – not foreigners," he said.

65 lakh names removed

Mr. Malviya said 65 lakh names removed from the draft voter roll in Bihar included those of fake voters, those deceased, and Bangladeshi and Rohingya people.

While the Supreme Court asked the list of deleted names to be published so that the affected persons could reapply, Mr. Malviya said only 84,305 objections had been filed so far, which is barely 1.3% of the total deleted names. It is well below the standard margin of error, he said. "Clearly, the 'vote chori' [theft] cry is manufactured," he said.

Former CM Champai detained in Ranchi

Deputy Superintendent of Police, Ranchi, K.V. Raman said Mr. Soren was put under house arrest as a preventive measure to maintain law and order.

Members of the Nagdi Zameen Bachao Sangharsh Samiti had organised the protest, saying the land identified for the proposed Rajendra Institute of Medical Sciences Hospital belonged to tribal communities and was traditionally used for farming.

Union Minister of State for Defence Sanjay Seth hit out at the Hemant Soren government for allegedly displaying a "dictatorial behaviour", and said there was an "undeclared emergency" in the State. "The house arrest of Champai Soren ... who raised his voice in favour of the rights of the tribal indigenous farmers of Nagdi, is a black mark on democracy. The attempt to destroy fertile agricultural lands in the name of RIMS-2 is in no way beneficial to the public interest," he wrote on X.

However, later in the afternoon, despite the deployment of a heavy police force, hundreds of Adivasi women took part in the protest and tilled part of the land. A scuffle broke out between Adivasi groups and police who fired tear gas shells to disperse the crowd.

"No matter how much the State government uses force, I will not allow even a single inch of land to be taken. I am thankful to the villagers who gathered and showed unity in ploughing the field. This land is for agriculture and if there would be more such lands, there would be statewide protest," Mr. Champai told presspersons in the evening.

A Health Department official said the hospital would be a 2,600-bed super-specialty facility. The government was likely to spend nearly ₹1,000 crore on the project backed by the Asian Development Bank.

Delhi police arrest second accused in CM attack case

Press Trust of India
NEW DELHI

The Delhi Police on Sunday arrested another accused in connection with the recent attack on Chief Minister Rekha Gupta.

Prior to the arrest, Tahseen Syed, a friend of prime accused Sakshi Rajeshbhai Khimji, 41, was brought to Delhi from Gujarat's Rajkot on Friday night for questioning and was made to confront Mr. Khimji to verify facts, the police said.

Mr. Khimji, an autorickshaw driver, attacked Ms. Gupta on August 20 allegedly in protest against the Supreme Court's order (since modified) on relocating stray dogs.

The incident happened at the Chief Minister's Jan Sunwai (public hearing) programme. He was arrested the same day.

Mr. Khimji had allegedly sent a video of Ms. Gupta's Shalimar Bagh residence to Mr. Syed, while the latter had sent him ₹2,000 and was in constant contact with him before the attack.

Mr. Khimji has five cases of assault and possession of liquor against him, filed between 2017 and 2024, at Rajkot's Bhaktinagar police station, the police said.

Search continues for 32 persons missing in Chishoti flash floods

Rajnath Singh meets injured in Jammu hospital, expresses satisfaction over prompt response of J&K administration, Army, NDRF, SDRF, police

The Hindu Bureau
NEW DELHI

As search continues for the 32 persons missing following the heavy rain and flash floods at Chishoti village in Kishtwar district of Jammu and Kashmir, Defence Minister Rajnath Singh on Sunday reviewed the ground situation through videoconferencing from Jammu.

Mr. Singh visited the Government Medical College (GMC) hospital in Jammu and met those injured in the flash floods at Chishoti village.

Mr. Singh, who could not travel to the affected areas due to inclement weather, expressed satisfaction over the prompt response and coordinated efforts of the State administration, Army, National Disaster Response Force (NDRF), State Disaster Response Force (SDRF), and the Jammu and Kashmir Police during the crisis.

"The Central government, under the leadership of Prime Minister Narendra Modi, is leaving no stone unturned in providing relief and rehabilitation to those affected by this tragic incident," he said.

During his hospital visit, Mr. Singh interacted with the injured and prayed for their speedy recovery. He was accompanied by Lieutenant-Governor Manoj Sinha and Union Minister Nitindra Singh.

Earlier, Mr. Sinha said the Defence Minister would visit the affected village, if weather permitted.

"If the weather permits, we will visit the affected village. Otherwise, he [Defence Minister] will meet the injured in GMC and return to Delhi," he said.

Rajnath Singh with Manoj Sinha during his visit to the GMC hospital to enquire about those injured in flash floods in Jammu. PTI

ship of Prime Minister Narendra Modi, is leaving no stone unturned in providing relief and rehabilitation to those affected by this tragic incident," he said.

Heavy rain lashed Chishoti village on August 14, killing 65 persons and injuring over 100, while the search for 32 other missing persons is continuing.

"Sixteen people are under treatment in the GMC and their condition is stable. I hope all of them will recover fully and return home soon," the Lieutenant-Governor said.

Mr. Sinha said ₹4.13 crore had been spent on relief and rehabilitation of the victims.

"If the weather permits, we will visit the affected village. Otherwise, he [Defence Minister] will meet the injured in GMC and return to Delhi," he said.

Wearing Tamil mask will not work in V-P election, says Stalin

The Hindu Bureau
CHENNAI

Tamil Nadu Chief Minister M.K. Stalin said on Sunday that the BJP was adopting the "old trick" of wearing the mask of Tamil identity to seek support in the Vice-Presidential election, despite its government having acted against the interests of Tamil Nadu and its people.

"Ideas, rather than individuals, should guide politics. Individuals are merely symbols. We must support pro-people ideologies," he said at a meeting organised by the DMK and its allies to introduce INDIA bloc Vice-Presidential candidate and former Supreme Court judge B. Sudershan Reddy.

The Chief Minister said Justice Reddy would honour Tamil Nadu and the aspirations of its people, at a time when the BJP was allegedly attempting to dismantle the Constitution.

M.K. Stalin

delivered landmark judgments to uphold justice, must win in the Vice-Presidential election to protect Indian democracy, the dignity of Parliament, and the Constitution," he said.

"It is unbecoming of a Home Minister to make such comments. The BJP government has failed to curb terrorism and Mr. Shah's accusation against Justice Reddy is merely an attempt to deflect attention from that failure," Mr. Stalin said.

Flays Shah's remarks

He also criticised Union Home Minister Amit Shah's remarks labelling Justice Reddy a "Naxalite".

"It is unbecoming of a Home Minister to make such comments. The BJP government has failed to curb terrorism and Mr. Shah's accusation against Justice Reddy is merely an attempt to deflect attention from that failure," Mr. Stalin said.

DRDO tests multi-layered air defence system successfully

Saurabh Trivedi
NEW DELHI

The Defence Research and Development Organisation (DRDO) successfully conducted the maiden flight tests of the Integrated Air Defence Weapon System (IADWS) off the coast of Odisha around 12.30 p.m. on Saturday.

According to the Defence Ministry, the IADWS is a multi-layered air defence system comprising indigenous Quick Reaction Surface-to-Air Missiles (QRSAM), Advanced Very Short Range Air Defence System (VSHORADS) missiles, and a high-power laser-based Directed Energy Weapon (DEW).

Three different targets, including two high-speed fixed wing unmanned aerial vehicle (UAV) targets and a multi-copter drone, were simultaneously engaged and destroyed com-

The Integrated Air Defence Weapon System (IADWS) being deployed, off the coast of Odisha, on Saturday. ANI

pletely by the QRSAM, VSHORADS and high-energy laser weapon system at different ranges and altitudes. All the weapon system components, including missile systems, drone detection and destruction system, weapon system command and control along with communication and radars, performed flawlessly, which was confirmed by range instru-

ments deployed by the Integrated Test Range at Chandipur. The test was witnessed by senior scientists from the DRDO and representatives from the armed forces, a press release stated.

Defence Minister Rajnath Singh complimented the DRDO, the armed forces, and industry for successful development of the IADWS.

Tariffs put on India to force Russia to stop war, says U.S. V-P

Press Trust of India
NEW YORK/WASHINGTON

U.S. Vice-President J.D. Vance on Sunday said President Donald Trump had applied "aggressive economic leverage" such as "secondary tariffs on India" to force Russia to stop bombing Ukraine.

Mr. Vance was speaking during an exclusive interview on NBC News "Meet the Press" when he also said the step would "make it harder" for the Russians to get rich from their oil economy.

The Trump administration has been highly critical of India for its procurement of discounted crude oil from Russia. Interestingly, Washington has not been criticising China, the largest importer of Russian crude oil.

India has been main-

taining that its energy procurement is driven by national interest and market dynamics.

If the U.S. is not "imposing new sanctions," what is the pressure on Russia? "How do you get them to a place of getting to the table with Zelensky and stopping to drop bombs?" moderator Kristen Welker asked.

Mr. Trump had applied "aggressive economic leverage," for example "secondary tariffs on India, to try to make it harder for the Russians to get rich from their oil economy," Mr. Vance replied.

"He tried to make it clear that Russia can be reinvited into the world economy if they stop the killing. But they are going to continue to be isolated if they don't stop the killing," he said.

Indian envoy Vinay Kwatra discusses 'fair' trade with U.S. lawmakers

Press Trust of India
NEW YORK

Indian envoy Vinay Mohan Kwatra discussed "fair, balanced and mutually beneficial trade ties" with U.S. lawmakers amid ongoing tariff tensions between New Delhi and Washington.

The Indian Ambassador has met four U.S. lawmakers in the past 24 hours and 23 since August 9, as revealed by his social media posts.

Mr. Kwatra met Congressman Representative Gabe Amo, Vice Ranking Member of the Subcommittee on Seapower and Projection Forces, on Saturday and thanked him for supporting the bilateral partnership between the two countries.

"Highlighted our perspectives on trade and economic cooperation, including the need for fair, balanced and mutually beneficial trade ties," Mr. Kwatra said on his social media post.

He also had a "productive discussion" with Congressman Jared Moskowitz, Ranking Member of the Subcommittee on Oversight and Intelligence (HFAC).

In his conversation with Congressman Ben Cline, the envoy highlighted India's growing hydrocarbon purchases from the U.S. "Had a productive conversation with @RepBenCline. Thanked him for his support to the bilateral partnership," Mr. Kwatra posted. "We discussed the importance of fair, balanced and mutually beneficial trade ties," he added.

NEWS ANALYSIS

Krishnadas Rajagopal
NEW DELHI

The Constitution (One Hundred and Thirtieth Amendment) Bill, referred to the Joint Parliamentary Committee, is the Union government's response to political corruption and a move to ensure Ministers, including Prime Ministers and Chief Ministers, do not run governments from jail. The Bill primarily banks on the power of arrest, and even runs the risk of politicising the power.

The Opposition has termed the Bill "unconstitutional" with an ability to bring elected governments down.

The Bill proposes that Ministers arrested for serious offences punishable with imprisonment of five

years and above, and incarcerated as undertrials for 30 days, would lose office either by default on the 31st day or on the order of the President/Governor. The Bill employs the statutory power of arrest to detain Constitutional authorities such as the Prime Minister or a Chief Minister. The text of the Bill uses the phrase "arrested and detained in custody" but does not specify by whom. It also does not pinpoint the exact laws under which these arrests would be made and merely says "under any law for the time being in force".

Kejriwal's bail
Supreme Court judgments have cautioned lawmakers against incentivising arrest. Recent years have witnessed summonses, arrests and detentions of a sitting Chief Minister and State

Ministers, especially in non-BJP-ruled States. The court has held against making arrest and prolonged incarceration tools of harassment and a punishment in itself.

"Arrest brings humiliation, curtails freedom and casts scars forever. Lawmakers know it, so also the police," the court had observed in *Arnesh Kumar versus State of Bihar*.

In *Arnav Ranjan Goswami versus Union of India*,

Granting bail to then Delhi Chief Minister Arvind Kejriwal in a CBI case registered in the liquor policy 'scam', Supreme Court judge Justice Ujjal Bhuyan, in a separate opinion, observed that the "power to arrest is one thing but the need to arrest is altogether a different thing. Just because an investigating agency has the power to arrest, it does not necessarily mean that it should arrest such a person".

In *Joginder Kumar Vs. State of Uttar Pradesh*, the court observed that "no arrest can be made just because it is lawful for police officers to do so... The existence of the power of arrest is one thing but justification for the exercise of it is quite another". Denying a person of his liberty is a serious matter.

In *Arnab Ranjan Goswami versus Union of India*,

the Supreme Court had observed the need to balance the requirement for the proper enforcement of criminal law on the one end and the need to ensure that the law did not become a ruse for targeted harassment on the other.

"Deprivation of liberty even for a single day is one day too many," the court had emphasised.

The Bill has come at a time when the Supreme Court has been vocally critical about arrests and incarcerations under the anti-money laundering law. Two separate Benches of the Supreme Court have questioned the "poor conviction rates" reached by the Central agency, observing that "out of about 400 Enforcement Case Information Reports you (ED) have registered, less than only 10 have reached conviction".

"Had a productive conversation with @RepBenCline. Thanked him for his support to the bilateral partnership," Mr. Kwatra posted. "We discussed the importance of fair, balanced and mutually beneficial trade ties," he added.

Amit Shah tabled the 130th Constitution Amendment Bill in the Lok Sabha on August 20.

SIR is an institutionalised way of stealing votes: Rahul Gandhi

The Congress leader says the Opposition will not allow vote theft in Bihar and accuses the Election Commission of being partial; all the INDIA bloc constituents are working unitedly for the Assembly polls and the results will be fruitful, he adds

Amit Bhelari
PATNA

Congress leader Rahul Gandhi on Sunday alleged that the special intensive revision (SIR) of electoral rolls was an institutionalised way of stealing votes in Bihar. He, however, asserted that the Opposition would not allow vote theft hereafter.

Mr. Gandhi, Leader of the Opposition in the Lok Sabha, said that all the INDIA bloc constituents in Bihar were working unitedly for the upcoming Assembly election and that the results would be fruitful.

Addressing a joint press conference of the INDIA bloc in Araria, Mr. Gandhi said that there was complete ideological and strategic cohesion among the parties in the grand alliance, and it reflected during the "Voter Adhikar Yatra", which had drawn a huge response.

Besides Mr. Gandhi, leaders such as Tejaswi Yadav of the Rashtriya Janata Dal (RJD), Pawan Khera, chairperson of the AICC media and publicity department, Dipankar Bhattacharya of the Communist Party of India (Marxist-Le-

Reaching out: Leader of the Opposition in the Lok Sabha Rahul Gandhi waving the party flag during the 'Voter Adhikar Yatra' in Purnia on Sunday. ANI

ninist), and Mukesh Sahani of the Vikasheel Insaan Party (VIP) addressed the joint press conference.

Acknowledging reality' Mr. Gandhi said the overwhelming support for the yatra was proof that crores of people in Bihar acknowledged the reality of electoral manipulation and were determined to stop it.

He said that during the yatra, children as young as six had started saying,

"Vote Chor, Gaddi Chhor

(Vote thief, leave the throne.)"

"We will not allow the Election Commission (EC) and the BJP to steal votes in Bihar. I have already proved beyond any doubt how one lakh fake voters were included in the Mahadevapura Assembly segment. Instead of taking any action, the Election Commission asked me to file an affidavit," the Congress leader said.

Accusing the EC of being partial, Mr. Gandhi said

that though BJP leader Anurag Thakur made the same allegations that he had made earlier, the commission had not asked him to submit an affidavit till this day.

'BJP-EC partnership' He added that such action proves there was a partnership between the EC and the BJP because the EC was not neutral.

Mr. Gandhi said the entire Opposition was speaking against the deletion of

voters from the electoral rolls, but not the BJP.

On a question about the INDIA bloc's plan for farmers if voted to power, Mr. Gandhi said, "The Mahagathbandhan [grand alliance] will prepare a Bihar-specific manifesto that will focus on debt relief, storage and export-import facilities to protect farmers from exploitation."

Mr. Yadav, too, accused the EC of acting like one more cell of the BJP. He said it was no longer the Election Commission, but the "Godi Commission".

He also pointed out how the Modi government had passed a law granting legal immunity to the Election Commissioners from any action, while making a law to remove Chief Ministers if they remained behind bars for a month.

Replying to a question about the INDIA bloc "tarining the image" of the EC through the Yatra as claimed by BJP leaders, Mr. Bhattacharya said if anyone was responsible for raising a question on the credibility of the Election Commission, it was the commission itself, which had become the "Electoral Omission of India".

INDIA bloc will not allow Bill to disqualify jailed Ministers, says Venugopal

The Hindu Bureau
NEW DELHI

Prime Minister Narendra Modi and Home Minister Amit Shah can put any politician in jail and then disqualify them. INDIA bloc will not allow this draconian Bill to be passed in Parliament

K.C. VENUGOPAL
Congress general secretary

dark age. We will survive this. The good times of democracy will be back," he said at a public gathering.

The Lok Sabha member said lakhs were marching with Opposition leader Rahul Gandhi against the Special Intensive Revision (SIR) of voter lists in Bihar.

"The Election Commission has become a tool of the BJP. People are gradually realising that this government is a bogus government. In 2024, the Modi government did not get a majority, they have stolen the election results. This Prime Minister is not a legitimate PM, he became PM by stealing the election results," he said.

'Dark age'

Mr. Venugopal said that instead of considering all as equal, those in power at the Centre are trying to divide and target them. "Legislation like Waqf Bill are for targeting communities," he said. "This is a

Minister two months ago by saying that Bangladeshi is had entered Bihar.

"That originally is the rationale for doing SIR," he said. "The EC has not sighted even a single Bangladeshi who has come into Bihar. So obviously it was a ruse," he said, adding that the BJP has been adopting procedures to win elections through "foul" practices since 2014. "In Maharashtra, they added votes to win and in Bihar they are deleting votes to ensure that they will win," he said.

Wayanad MP Priyanka Gandhi Vadra said the SIR was a full-fledged attack on democracy. "The right of every citizen to vote and elect a government of his or her choice has been effectively taken away from lakhs and lakhs of citizens of India," she said.

Foul practices' Senior lawyer and Rajya Sabha member Kapil Sibal said the narrative on SIR was set by the Union Home

Fear of defeat in Bihar polls is haunting Rahul: Thakur

Press Trust of India

SHIMLA

Former Union Minister Anurag Thakur attacked Leader of the Opposition in the Lok Sabha Rahul Gandhi on Sunday, saying the Congress has "lost around 90 elections" under Mr. Gandhi's leadership and he is now "haunted" by the "fear of another defeat" in the upcoming Bihar Assembly election.

The BJP MP said that Mr. Gandhi blamed VVPATs or EVMs after every electoral defeat, and "now, even before the polls, he is making baseless statements about the Election Commission".

"It is very unfortunate if the Opposition has lost faith in the country's constitutional framework," he said. He added that work to strengthen constitutional institutions was undertaken during the tenure of the BJP-led governments.

Parliament, Assemblies should not be prevented from functioning for political interests, says Shah

The Hindu Bureau

NEW DELHI

Paying tribute: Home Minister Amit Shah pays floral tribute to freedom fighter Vithalbhai Patel in New Delhi on Sunday. ANI

Parliament and Assemblies should not be prevented from functioning for political interests, and while symbolic protests have their place, the practice of obstructing the House day after day under the pretext of protests requires reflection, Union Home Minister Amit Shah said on Sunday.

He was speaking at the launch of the two-day All India Speakers' Conference organised at the Delhi Assembly.

The conference is being held to commemorate the 100th anniversary of Vithalbhai Patel becoming the first elected Indian President (Speaker) of the Central Legislative Assembly, the Lower House of the legislature of British India.

The House had initially convened in the building that currently houses the Delhi Assembly. The House had initially convened in the building that currently houses the Delhi Assembly.

He said that this House

had seen significant contributions from many distinguished leaders of India's Freedom Movement, and eminent figures such as Mahatma Gandhi's mentor, Gopal Krishna Gokhale, Lala Lajpat Rai, and Deshbandhu Chittaranjan Das had expressed the nation's longing for freedom and their aspirations for Independence through their powerful speeches.

Mr. Shah requested the

Central Assembly, he said.

The Union Minister said the most challenging role in the House was that of the Speaker, as they were elected from a political party, but, upon taking oath, assumed the role of an "impartial umpire".

He said that impartiality and justice were the two pillars on which the Speaker's dignity rested, and in a way, the Speaker was considered both the guardian and servant of the House.

He said the proceedings of the Legislative Assembly must focus on three key aspects – wisdom, ideas, and legislation.

He said wisdom gave rise to ideas, and ideas led to legislation, which was the primary function of the Assembly. The ultimate purpose of any law should be public welfare, he added.

The Minister said that when the Speaker fully respected wisdom, ideas, and legislation, the Legislative

Assemblies rose above partisan interests to focus on the interests of the State and the nation, and the Lok Sabha focused on national interests.

Mr. Shah said all legislators must work towards increasing the dignity and respect of the post of the Speaker.

'Guiding light'

Praising the contributions of Vithalbhai Patel, Delhi Chief Minister Rekha Gupta said as President of the Central Legislative Assembly, he established the highest standards of parliamentary dignity and discipline and his life's work served as a guiding light in the journey of making India the 'Mother of Democracy'.

Delhi Assembly Speaker Vijender Gupta, Union Parliamentary Affairs Minister Kiren Rijiju, and Delhi Lieutenant-Governor Vinay Kumar Saxena were present at the event.

To reach 10% women in force, CISF set to add 2,400 personnel

The Hindu Bureau

NEW DELHI

The CISF is inducting first-ever all-woman commando team for core operations such as deployment at airports

The programme includes physical fitness and weapons training, live-fire drills under stress, endurance-building exercises such as running, obstacle courses, rappelling, survival training in forests, and a ruse, a CISF official said.

The CISF is also inducting the first-ever all-woman commando team for core operations such as deployment at airports and other vital installations.

"Training of women commandos has already begun at the Regional Training Centre (RTC) in Barwaha, Madhya Pradesh. The eight-week advanced commando course will prepare women personnel for Quick Reaction Teams and Special Task Force duties at high-security establishments and plants," the official said.

In the initial phase, at least 100 women from different Aviation Security Groups (ASGs) and sensitive CISF units will complete the programme.

AAP will not join JPC, says Bill designed to trap the Opposition

The Hindu Bureau

NEW DELHI

The Aam Aadmi Party (AAP) on Sunday attacked the Bharatiya Janata Party (BJP) over the proposed Bill to "sack" Chief Ministers. The party alleged that the Bill was designed to jail Opposition leaders in false cases, and that it would not join the Joint Parliamentary Committee (JPC) being set up on the matter.

"The real objective of this Bill is not to fight corruption but to topple governments, break parties, indulge in horse trading, trap Opposition leaders in false cases, send them to jail, and force their resignations. This Bill is being brought with the intent of

destroying democracy. Therefore, the AAP and Arvind Kejriwal have decided that we will not participate in the Joint Parliamentary Committee (JPC) being set up by the government," AAP Rajya Sabha member Sanjay Singh said.

Corruption and corrupt "The BJP and Narendra Modi are in love with corruption and the corrupt."

Ajit Pawar, Narayan Rane, Chhagan Bhujbal, Hasan

Mushrif, G. Janardhana Reddy, B.S. Yediyurappa, Mukul Roy, and Suvendu Adhikari from the Saradha-Narada scam, Himanta Biswa Sarma – which party are all these corrupt leaders in today?" the AAP leader said.

The Leader of the Opposition in the Lok Sabha, Rahul Gandhi, who has a one-day break in his ongoing

Committee of Parliament. Mr. Kharge claimed that the Bills take away the right of citizens to form or remove their elected government. This power will now go to institutions such as the Enforcement Directorate, Central Bureau of Investigation, he added.

Arrest being used as a weapon to dismiss governments, says Kharge

After "vote chori", the BJP is now engaged in "satta chori" [government theft] by bringing Bills to topple Opposition governments within 30 days by using arrest as a weapon, Congress President Mallikarjun Kharge said on Sunday.

Mr. Kharge made the remarks in his opening statement at a meeting with DCC presidents of Haryana and Madhya Pradesh. PTI

pal, who also addressed the meeting, in a post added, "After this session, DCC presidents will also attend a 10-day rigorous training camp to prepare them for their crucial responsibilities".

He spoke about the three Bills which have now been referred to a Joint

Committee of Parliament. Mr. Kharge claimed that the Bills take away the right of citizens to form or remove their elected government. This power will now go to institutions such as the Enforcement Directorate, Central Bureau of Investigation, he added.

On the lookout

"The BJP will continue to cut the votes of our people with schemes like SIR. The biggest responsibility of the district president is that we have to be careful for the entire five years. We have to keep intensively checking our voter list so that if BJP people or Booth-Level Officers cut the names of our people, we can catch them immediately," Mr. Kharge said.

Former CRPF D-G Anish Dayal Singh appointed Deputy NSA

Former CRPF and ITBP Director-General Anish Dayal Singh has been appointed the new Deputy National Security Adviser (NSA), with a mandate to handle internal affairs, official sources said. Mr. Singh, a 1988-batch Indian Police Service (IPS) officer from the Manipur cadre, retired from service in December 2024. He brings extensive experience to the role, having served for nearly 30 years in the Intelligence Bureau (IB) before heading the Indo-Tibetan Border Police (ITBP), and most recently, the Central Reserve Police Force (CRPF). According to officials, Mr. Singh will be in charge of internal affairs of the country, including Jammu and Kashmir, and Naxal and northeastern insurgency, as the Deputy NSA. PTI

PM to launch railway projects worth over ₹1,400 crore

Prime Minister Narendra Modi will inaugurate railway projects worth over ₹1,400 crore during his visit to Gujarat on August 25 and 26. These include doubling of the 65-km Mahesana-Palanpur rail line worth ₹537 crore and gauge conversion of the 37-km Kalol-Kadi-Katosan Road rail line at ₹347 crore and 40-km Becharaji-Ranuj rail line at a cost of ₹520 crore. "With the addition of broad-gauge capacity, these projects will ensure safer and seamless connectivity in the region, especially for Mahesana, Banaskantha and Patan districts," a railway official said. The new Katosan Road and Sabarmati service line is likely to improve access to religious destinations.

NCERT textbooks introduce Indian art forms

Maitri Purecha
NEW DELHI

In line with the National Education Policy that education be rooted in the Indian ethos, the National Council of Educational Research and Training (NCERT) has included art forms such as Indian classical music, dance, theatre, and visual arts in the new textbooks for Class 3 to 8.

The new arts education textbook, titled *Kriti*, introduced for Class 8 students in the academic year 2025-26, delves into the details of *swar*, *laya*, and *shabd* – the basic components of classical Indian music. The book prescribes the recitation of *shlokas* in Sanskrit through *swar* and *laya* patterns, introduces folk or traditional songs in regional languages, and also exposes students to the patterns of seven notes of classical music in different *layas*. The curriculum also focuses on the rendition of *ragas* from

Teaching traditions: Students will be exposed to Indian dance forms such as Bharatnatyam, Kathak, Kathakali, and Kuchipudi.

Hindustani and Carnatic music.

Similarly for dance, students are exposed to Indian dance forms such as Bharatnatyam, Kathak, Kathakali, Kuchipudi, Manipuri, Mohiniyattam, Odissi, and Sattriya.

"Before this, there was no school textbook which exposed students to classical forms of dance and music. They would have to enrol in private training for learning these forms. Now they will get exposed to

these as a part of the school curriculum," Sangeet Natak Akademi Chairperson Sandhya Purecha, who is also chairing the textbook development team working in collaboration with the NCERT, told *The Hindu*.

The textbook draws heavily from the *Natyashastra*, a Sanskrit treatise on performing arts; *Brihaddeeshi*, a Sanskrit text on Indian classical music; and *Sangita Damodara*, among others. Chapters on dance qu-

ote from the Sanskrit scripture *Abhinaya Darpanam*, which focuses on expression through *hasta mudras*, or hand gestures.

Basic concepts

Ms. Purecha said that school students were mostly attracted to cultural activities and looked forward to the arts period. "Activities such as storytelling, *abhinaya* (acting or facial expressions), and dance are enjoyed by children," she said.

"Our idea is not to develop a student's expertise in Bharatnatyam or Kathak, or Indian classical music at this stage. That would take years of practice. What we have done in the book is drawn from these concepts, for instance, basic *hasta mudras* (hand gestures) in Indian dance forms, which are photographically depicted and can be incorporated in dance or theatre performances that students conceive. Also, basic leaps,

jumps, circles are formations that are derived from classical dances can be incorporated into contemporary or folk dances that students may conceive as a part of their projects," Ms. Purecha said. "Similarly, basics of classical music like *ragas* and *taal* is inculcated so that a student may appreciate a classical singing performance with some background knowledge."

The new textbooks for Class 3 to 5 are titled *Bansuri*, while those for Class 6 to 8 are titled *Kriti*. They expose children to Indian art forms in stages, in an age-appropriate manner, and have been conceived after over a year of deliberations. In the foreword of the Class 8 textbook, NCERT Director Dinesh Saklani notes, "*Kriti* has infused in its visuals and other components, the rich Indian Knowledge systems, India's artistic and cultural heritage, values - all deeply rooted in Bharat."

"No higher educational institutions shall be permitted to offer any allied

Press Trust of India
NEW DELHI

The University Grants Commission (UGC) has directed all higher education institutions to stop offering programmes in healthcare and allied disciplines, including psychology and nutrition, through open and distance learning or online mode from the 2025 academic session, according to officials.

The ban applies to courses under the National Commission for Allied and Healthcare Professions (NCAHP) Act, 2021. These include psychology, microbiology, food and nutrition science, biotechnology, clinical nutrition, and dietetics.

"No higher educational institutions shall be permitted to offer any allied

and healthcare programmes covered in NCAHP Act, 2021, including psychology as specialisation under Open and Distance Learning and online mode, from the academic session July-August 2025 and onwards. Any recognition already granted to HEIs for offering such programmes for the academic session July-August 2025 and onwards shall be withdrawn," he added.

The institutions have been directed not to admit any student in such programmes from the upcoming academic session. The decision comes amid concerns over quality standards in professional training.

FAITH

The Lord and His devotees

Srimad Bhagavatam shares noble tales of valiant kings, especially in the *Navamaskandam* (Ninth Chapter). These monarchs were deeply devoted and willing to sacrifice. Their significance was so great that even the sages praised them. This section focuses on two dynasties: the Surya Vamsam (Solar Dynasty) and Chandra Vamsam (Lunar Dynasty). Through these lines, the Lord took His cherished incarnations on earth, Sri Ramavataram and Krishnavataram, to reveal the path of truth and devotion.

Sri Hariji said in a discourse that King Ambarisha was a great ruler and devotee. Sage Durvasa tried to wreak havoc on Ambarisha's steadfast *vratam*. Still, Lord Vishnu, to whom the sage had surrendered, who was chased by Sudarsana chakra, the worshipping deity of Ambarisha, told him to return to the king and seek his pardon. Scripture tells us that God always protects His devotees. This only shows that, though the Lord is omniscient, omnipresent, and omnipotent, He abides with His devotees.

The playful deeds or leelas of Lord Krishna in Gokulam are joyful. The gopikas rejoiced in His divine presence and sang His holy names through Krishna Nama Sankeertanam. This shows us the strength of devotion and the delight that comes from remembering the Lord through His names. The attachment of His followers binds the Lord.

The primary lesson from these stories is that bhakti, or simple devotion, provides the safest path to union with the Lord. Listening to His stories, reciting His names, and remembering Him often are all simple practices that bring us closer to Him. He promises to care for and protect those who surrender to Him.

ISRO holds air-drop test for Gaganyaan mission

A dummy crew capsule weighing around 5 tonnes was dropped by a helicopter to check how the parachute system designed for the human spaceflight mission performs in real-world conditions

The Hindu Bureau
CHENNAI

The Indian Space Research Organisation (ISRO) on Sunday successfully carried out its first Integrated Air Drop Test (IADT-1), a critical milestone in preparations for the country's maiden human spaceflight programme, Gaganyaan.

"ISRO successfully accomplishes first Integrated Air Drop Test (IADT-01) for end-to-end demonstration of parachute-based deceleration system for Gaganyaan missions," the ISRO wrote on X.

The IADT is a specialised trial to ensure the parachute system designed for the Gaganyaan crew module performs reliably in real-world conditions.

During the test, a dummy crew capsule weighing around five tonnes was lifted up through the air before being dropped by a Chinook helicopter. As it descended through a few km, its main parachutes had to open in a specific sequence to decelerate the capsule to a safe splashdown speed.

During an actual flight with astronauts, the main

Flight check: The ISRO conducts the first Integrated Air Drop Test for an end-to-end demonstration of the parachute-based deceleration system for the Gaganyaan mission in Bengaluru on Sunday. ANI

parachutes will have to deploy after the capsule has re-entered the atmosphere and has been slowed first by the heat shields and drogue parachutes. The ascent, descent, and post-splashdown phases of the Gaganyaan mission are expected to be the most risky for the astronauts.

According to the ISRO, the effort brought together multiple national agencies – the Air Force, the Defence Research and Development Organisation, the Navy, and the Coast Guard

– in what officials described as a coordinated step towards human-rating India's launch and recovery systems.

Earlier this week, Union Minister of State for Science and Technology Jitendra Singh told the Lok Sabha that major preparatory work for Gaganyaan had already been completed.

"The propulsion systems for the crew module and service module have been developed and tested. Environmental control and life support system engineering model realised. Crew escape system (CES): five types of motors developed and static tested," Mr. Singh said in a written reply.

He said infrastructure had been established for "orbital module preparation facility, Gaganyaan Control Centre, Gaganyaan control facility, crew training facility, [and] second launch pad modifications". A series of precursor missions, including test vehicle flights, were currently under way, he added.

Defence Minister felicitates Group Captain Shubhanshu Shukla on Sunday. ANI

space-derived technologies, from communication satellites to weather monitoring and disaster management, are now delivering services to every part of the country. "In the coming times, space mining, deep space exploration, and planetary resources will redefine the course of human civilisation".

"We do not see space only as a field of research, but as the future of tomorrow's economy, security, energy, and humanity. We have already marked our presence from moon to Mars, and today, the nation stands fully prepared for missions like Gaganyaan," he said at South Block, where he felicitated Group Captain Shukla and the other Gaganyaan astronauts. He also held discussions with them about Gaganyaan and their experiences so far.

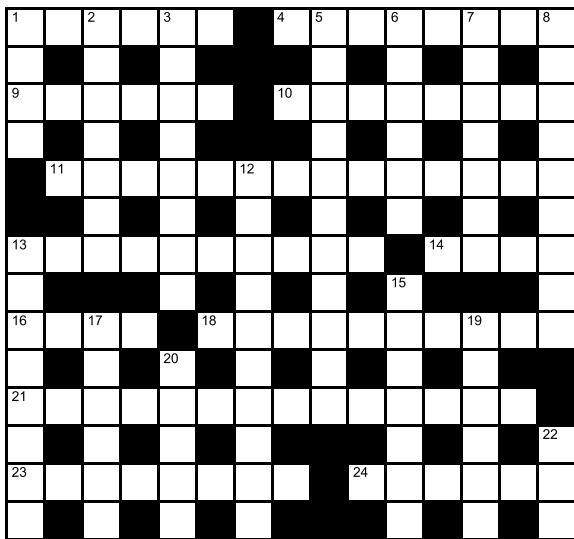

Mr. Singh said India's space programme was a reflection of national aspirations and global vision, citing the successes of Chandrayaan and Mangalyaan. He added that

Emergency fund lapses

Santosh Agarwal

An emergency fund is one of the most important pillars of financial planning. Without an adequate emergency fund in place, a single financial exigency can push one to high-cost debt, premature liquidation of investments and even adversely impact financial health for long term.

Costly errors

Here are some mistakes to avoid in building/maintaining such a fund.

No adequate corpus

For salaried individuals, the fund should be large enough to cover all non-discretionary expenses such as daily living expenses, existing EMIs, utility bills and insurance premiums for at least six months. Self-employed individuals with greater uncertainties in income and cash flows should have a fund, covering at least 9-12 times of unavoidable monthly expenses. Also, in periods of economic uncertainty, salaried individuals must raise the fund size to sustain non-discretionary spends for at least 12 months. Having such a emergency fund will save you from compromising crucial financial goals or expensive loans.

Fund in illiquid instruments

As financial exigencies can strike any day, individuals must park the funds in financial instruments offering instant liquidity. They may consider high-yield savings accounts offered by some private sector banks and small finance banks, with savings account interest rates of up to 7%, depending on the balance maintained in the accounts. Those comfortable with Internet/mobile banking can consider high-yield fixed deposits offered by some scheduled banks for the funds.

Investing in high risk assets

Attracted by the possibility of earning attractive returns, some may think of investing the fund corpus in equities (including equity funds) or other high-risk asset classes. While equities as an asset class usually outperforms other asset classes by a wide margin over the long term, it can be highly volatile in the short term. Thus, any sharp erosion in the corpus coinciding with a financial emergency can seriously undermine the very purpose of maintaining the fund. One should stick to fixed income instruments like fixed deposits, high-yield savings account, liquid funds, overnight funds, etc. for parking the corpus.

Funding non-essential needs

An emergency fund is supposed to serve only one purpose - to deal with financial emergencies. However, the significant size of a fund may tempt one to use it for consumption purpose or for filling up the shortfalls for other life goals. For example, someone planning to avail a loan to buy a house may think of tapping into the fund to make a higher down payment. This should be avoided as any financial exigency occurring thereafter may force the individual to avail loan at higher rates or redeem his/her existing investments earmarked for other financial goals - possibly at a loss during market corrections or bearish markets.

Not reviewing fund size

Like most things in life, the size of an emergency fund should not remain static. As your monthly expenses rise due to inflation and lifestyle upgrades, the emergency fund corpus should also grow proportionately. Similarly, events like marriage, birth of a child, taking or paying off a loan, etc or instability in your job or broader economic environment should require immediate re-evaluation of emergency fund requirements.

If the size of your emergency fund cannot be increased immediately, try to increase it to the required size via staggered contributions with high priority.

Not replenishing fund

Once you tap into your emergency fund to manage a financial exigency, make sure to restore it back to its required size at the earliest.

Prioritise its restoration by diverting some of your existing liquid investments to your emergency fund or by redeeming a portion of your equity or other market-related investments. Else, rebuild it by making regular contributions in a staggered manner.

Cryptocurrency: unlocking the digital vaults

Millions of people globally are investing in cryptos but do not follow them blindly; if you don't know what you're buying, then, you are not investing, you are just gambling with your money

VIRTUAL MONEY

Vaishali R Venkat

Two decades ago, if you had told someone you were investing in a currency not regulated by the government, or didn't bear the signature of RBI Governor and couldn't be seen but only stored in virtual wallets, they would have laughed at you.

Fast forward to 2025. Several firms have started accepting crypto payments. Millions of people, including in India, are investing in crypto coins. But should you blindly jump on the crypto bandwagon?

Only if you have the knowledge of it's working. If you don't know what you're buying, you are gambling with money.

So, before you start driving the crypto vehicle, let's decipher how this engine is built and what are its spare parts. How does the vehicle operate without the driver - that is the Central bank? And, the fuel that runs the vehicle.

To answer all the questions, we need to understand a technology that fuels this complicated and evolving system - the blockchain. It's the backbone - or the engine - that drives the crypto vehicle. Let's find out what makes it so different compared with traditional investments.

About cryptocurrency

The term 'crypto' is derived from the Greek word 'kryptos', which means

Cryptocurrency, known as crypto or coins, uses cryptography to secure transactions. You cannot see or touch crypto coins physically. You need not visit bank for transaction

hidden or secret. As the name indicates, cryptocurrency, popularly known as crypto or coins, uses cryptography to secure transactions. You cannot see or touch the crypto coins physically. You need not visit a bank for transaction. It's not controlled by any single institution such as the SEBI, the RBI, or even the Government of India.

The entire process is executed behind several layers of encryption, algorithms, and codes on multiple servers. It's a decentralised network of computers, called nodes, that verifies and records each transaction. The nodes ensure transparency and security without the need for centralised intermediaries.

What is blockchain?

Imagine the blockchain as a combination of a traditional accountant's notebook, wherein everyday transactions are recorded, and a common Google Sheet, the link to which is shared with people across the world.

In a traditional ledger, each page contains several transaction entries. Once the page ends, you flip to

A blockchain ensures transparency, security and trust and all these happen without the aid of a bank; everything is taken care of by behind-the-scenes nodes

the next to record fresh transactions. None of the fresh pages is isolated; the closing balance of the previous page becomes the opening balance of the next viz. each page is linked to the previous one. Once it is completed, it can't be altered or erased.

In cryptocurrencies, this digital ledger is known as blockchain. Technically, blockchain contains the complete transaction history of a particular cryptocurrency. Every time a transaction takes place, someone makes an entry into this digital notebook. In a blockchain, each page is called a block. Once particular block is done with the transactions, it's sealed permanently, timestamped and linked to the next block (page) through a unique code called hash.

In a similar vein, you can keep adding block after block to the digital ledger, forming a long chain. That's why this digital ledger is called blockchain.

In a traditional setup, not everyone has access to a manual accounts book, except the chief accountants or the authorities concerned. But blockchain is like a globally-shared

Google Sheet and everyone in the network has the link to it. Since anyone can access it, they can view the entries in a block and add new ones. But here's the catch: no one can delete, erase or tamper with the previous entries and the transaction history is recorded for ever.

How does it work?

Every time a transaction occurs, say, Ram sends a crypto coin to Shyam, it gets bundled with the previous transactions into a block. If Shyam then sends the coin to Nitish, that transaction is also added to the same block. Once the block is full, it's sealed and linked to the next block with a hash. Further, whenever a new entry is made, everyone in the network can see the updated record - think of it like a shared G-Sheet. Thus, a blockchain ensures transparency, security and trust and all these happen without the aid of a bank, without a central authority or an intermediary. Everything is taken care of by the behind-the-screen nodes.

Now that you know what a blockchain is, the next question is who adds the blocks and how they get added? This is the foundation on which lies the operation of cryptocurrencies and is helpful in deciding if a coin is worth investing. We'll explore that in detail in the next part.

Twists in hospital insurance

COVERNOTE

K. Nitya Kalyani

Service providers flood us with marketing material and the real information or transactional messages are easily missed.

Zone-based premium

One such communication was an email from the insurer with whom I have my hospitalisation policy and it conveyed an unhappy announcement. It said hospitalisation premiums henceforth will be charged according to the zone in which the insured lives and pegged to an individual's age and not age-slabs as is the case now.

The first change means premium will be higher in certain cities grouped as Zone 1 and layered for Zone 2, 3 etc. Each insurer has its own definition of zones and usually, major metropolitan cities with higher healthcare costs will carry higher premiums than others. That is the shape of things to come and insurers are, as expected, presenting this market segmentation as something beneficial to us!

One insurer said such rating reduces the premium paid by 10-20% and people living in lower-cost areas will benefit. I can envision nobody's rates going down, but that higher cost zone rates will definitely jump.

What if you live in Zone 2 and get treated in Zone 1? Either you have an add-on cover for that contingency or the co-pay will be higher. If the opposite happens you don't get any benefit though treatment costs less in Zone 2 or 3 than in Zone 1 for which you have paid premium.

Age-wise premiums means where one paid a certain premium from age 50 to 55, there will be enhancement each year. This flies in the face of one of the most basic tenets of insurance, namely group-loss experience and the spreading of risk. According to this, the loss experience of the 50-55 age group is supposed to be set off by the premium calculated on the basis of historical hospitalisation and claims data experience for that demographic.

However, individual hospitalisation expenses for each of us may take place in a specific year, let's say, and that represents a spike in one year out of five. Some may have more than one hospitalisation and others none and at different ages for different insureds. Taken over the five-year period, these spikes are smoothed out and that is how insurance spreads risk. This advantage is lost to the insured with age-wise premium rating.

It brings to mind shrinkflation, the marketing art of shrinking a product offering and selling it at same price. Both the moves echo of that strategy. You pay the same (or more) for essentially a truncated offering, a smaller geographical zone or price stability for a shorter period.

The changes are happening on the top of hospitalisation cover premiums having seen substantial hikes (easily 50-100%) over the last year or so. These are some of the nuances of rising costs detailed in the earlier installment of CoverNote. Insurers are mitigating these with some offers and sops.

Sudan's paramilitary group shells hospital, abducts 8 in besieged city

Sudan's paramilitary Rapid Support Forces shelled a hospital in North Darfur's besieged city of El-Fasher and abducted six women and two children from a displacement camp, rescuers and a medic said on Sunday. More than 20 camp residents were missing, the rescuers said, warning the actual number could be higher. AP

Former Sri Lankan Presidents, prominent Opposition leaders condemn Ranil's arrest

They accuse the National People's Power (NPP) government of pursuing 'political revenge', contending that charges against Wickremesinghe did not warrant arrest; Maithripala Sirisena, who had sacked Ranil as his PM in 2018, says latest actions go against the country's basic democratic principles

Meera Srinivasan

COLOMBO

Former Presidents of Sri Lanka and prominent members of the political opposition have condemned the recent arrest of former President Ranil Wickremesinghe for allegedly misusing public funds while in office.

Addressing a media conference in Colombo on Sunday, they accused the National People's Power (NPP) government of pursuing "political revenge", contending that the charges against Mr. Wickremesinghe did not warrant arrest.

On Friday, the Sri Lan-

United front: Opposition members address the media on Ranil Wickremesinghe's arrest in Colombo on Sunday. MEERA SRINIVASAN

kan police arrested Mr. Wickremesinghe, 76, after questioning him about his 2023 visit to the United Kingdom, to attend a ceremony with his wife. Mr.

Wickremesinghe was remanded in custody on Friday and shifted to the Intensive Care Unit of the Colombo National Hospital on Saturday.

Former President Chandrika Bandaranaike Kumaratunga termed the arrest a "calculated onslaught on the very essence of our democratic values". Issuing a statement, the senior politician said, "The consequences of this go far beyond the fate of an individual or any political grouping and involve peril for the rights of our society as a whole."

Several politicians, including the allies of Mahinda Rajapaksa and some others who lost or did not

contest last year's elections, joined the media conference held at a Colombo hotel, which was titled 'Let's defeat the constitutional dictatorship'.

Former President Maithripala Sirisena – who in 2018 controversially sacked Mr. Wickremesinghe, then his Prime Minister, in a move that the Supreme Court later ruled was illegal – said, "our country is used to very open democratic practices... such actions go against those basic principles." Leader of Opposition Sajith Premadasa was absent.

Former minister G.L. Peiris said while corruption "must be eradicated from our body politic", Mr.

Wickremesinghe's arrest was unwarranted as "there was no fear of his absconding".

Tamil Progressive Alliance Leader and opposition MP Mano Ganesan said, "The government could have kept its pledge and proven old allegations of overseeing torture and a massive scam (at the Central Bank) against Mr. Wickremesinghe. Instead, it resorted to charges of misusing public funds...this is political revenge."

Sri Lanka Muslim Congress Leader Rauff Hakeem slammed the government for treating Mr. Wickremesinghe "like a common criminal" for "applause from the gallery".

Trump will deploy troops in Chicago after Washington'

Agence France-Presse

WASHINGTON

The Trump administration has been planning for weeks to deploy National Guard troops in Chicago as part of an expanded crackdown on crime and immigration, according to reports in U.S. media.

The Pentagon has been sketching out plans that could mobilise several thousand National Guard members to the nation's third-largest city as early as September, *The Washington Post* reported, quoting unidentified officials familiar with the matter.

The Pentagon refused to confirm the reports. "We won't speculate on further operations," a defence official said. "The Department is a planning organisation

and is continuously working with other agency partners on plans to protect federal assets and personnel," the official said.

The reports come after Mr. Trump deployed National Guard troops this month in Washington DC, where another official said personnel would soon be carrying weapons.

Drone strike sparks fire at Russian nuclear plant

Associated Press

Russia accused Ukraine on Sunday of launching drone attacks that sparked a fire at a nuclear power plant in its western Kursk region overnight, as Ukraine celebrated 34 years since its independence.

Officials said power and energy facilities were targeted in the overnight strikes. The fire at the nuclear facility was extinguished with no injuries reported. While the attack damaged a transformer, radiation levels remained within normal ranges. The United Nations' nuclear watchdog said it was aware of media reports that a transformer at the plants had caught fire "due to military activity," but had not received confirmation.

'Security guarantee, no NATO are Russia's terms for peace'

Reuters

MOSCOW

Sergey Lavrov

Russian Foreign Minister Sergey Lavrov said in an interview published on Sunday that a group of nations including United Nations Security Council members should be the guarantors of Ukraine's security.

Mr. Lavrov told NBC News' "Meet the Press" that Russian President Vladimir Putin and U.S. President Donald Trump had discussed the issue of a security guarantee for Ukraine and that Mr. Putin had raised the issue of the failed Istanbul discussions of 2022.

Talks of 2022
At those discussions, Russia and Ukraine discussed Ukraine's permanent neutrality in return for security guarantees from the five

permanent members of the UN Security Council: Britain, China, France, Russia and the United States, and other countries, according to a copy of a draft agreement seen by Reuters in 2022.

Mr. Lavrov told NBC that a group including Security Council members should guarantee Ukraine's security. The group could also include Germany and Turkey and other countries,

Mr. Lavrov said.

"And the guarantors would be guaranteeing the security of Ukraine, which must be neutral, which must be non-aligned with any military bloc and which must be non-nuclear," Mr. Lavrov said.

Mr. Lavrov also made it clear that NATO membership for Ukraine was unacceptable for Russia, that Russia wanted protection for Russian speakers in Ukraine and that there was a territorial discussion to be had with Ukraine.

Vance's remark
Meanwhile, U.S. Vice-President J.D. Vance rejected suggestions Moscow is slow-walking a potential peace deal in Ukraine, saying Russia has made "significant concessions" to Donald Trump over its demands for ending the war.

Pakistan Foreign Minister asks Bangladesh to move past the 'unresolved issues' of 1971

Kalol Bhattacharjee

NEW DELHI

Bangladesh should "clean" its heart and move ahead by leaving the "unresolved issue" of Pakistan's accountability in the atrocities committed by the Pakistani military in 1971, said Mohammad Ishaq Dar, Foreign Minister and Deputy Prime Minister of Pakistan on Sunday in Dhaka.

Mr. Dar, the first Foreign Minister of Pakistan to visit Bangladesh in a decade, met Prof. Mohammed Yunus, Chief Adviser to the government of Bangladesh. Pakistan and Bangladesh also signed a treaty that will allow diplomats of

Repair mode: Mohammad Ishaq Dar, left, with Mohammad Touhid Hossain during a bilateral meeting in Dhaka on Sunday. AFP

both sides to travel without visas.

"In 1974, that issue was resolved. After that General Musharraf came here and addressed this [issue] in a candid manner and I think even Islam tells us to

clean your hearts," Mr. Dar said after holding talks with the interim government's Adviser on Foreign Affairs Touhid Hossein.

The issue of accountability of Pakistan for the atrocities of 1971 has been a

long standing obstacle in normalising ties. Mr. Dar indirectly referred to the Tripartite Agreement of 1974 signed by Bangladesh, India and Pakistan where Pakistan had acknowledged the involvement of its military in the atrocities, and referred to the "regret" expressed by General Musharraf during his 2002 visit of Dhaka.

Mr. Hossein said: "We want accountability, reparations. We want Pakistan to express remorse and seek forgiveness for the mass killings that took place here". He also acknowledged that China is supportive of Pakistan-Bangladesh bilateral ties.

HIMACHAL PRADESH PUBLIC WORKS DEPARTMENT**(INVITATION FOR BIDS (IFB))****(e-Procurement Module)**

The Executive Engineer, Chamba Division, HPPWD Chamba H.P. on behalf of Governor of H.P. invites the percentage item rate bids, in electronic tendering system, from the eligible class of contractors registered with HPPWD for the works as detailed in the table.

Sr. No.	Name of work	Estimated Cost (Rs.)	Earnest Money (Rs.)	Cost of tender form (Rs.)	Class	Completion period
1	2	3	4	5	6	7
1.	Construction of Multipurpose Hall Administrative Block, Atal tinkering Lab, Vocational Lab ICI in Govt Senior Secondary School District Chamba (Sh:- Construction of Building portion WS & SI, septic Tank Rain Water Harvesting, Boundary wall & Rain development work)	2,43,21,762/-	4,86,480/-	7,000/-	A & B	Twelve Months

The Executive Engineer HPPWD Kasauli Distt solan HP on behalf of Governor of HP invites the Online bids on Percentage rates in electronic tendering system, in 2 cover system for the under mentioned work from the eligible and approved contractors/Firms registered with HPPWD Department.

Job No.1:-
Name of work: Periodical renewal and maintenance of Garkhal to Subathu road in Km. 0/00 to 17/35,(SH:- Scouring, P/L GSB, WMM,WBM, G-II, BM, at various Rds & P/L 25mm Bituminous Concrete alongwith thermoplastic edge line in Km. 0/00 to 16/00)Under PMGSY incentive through post DLP (Package No.HP11-35), Tentative Cost-2,62,06,392/-, Earnest Money-5,24,100/-, Time allowed - Six Months, Cost of Form- 7000/-, Starting date for downloading bid- 27.08.2025 Deadline for submission of bid- 04.09.2025 at 10.30AM Date of Opening of Bid- 04.09.2025 at 11.30AM

COOL CUSTOMER

It was always reassuring to see Pujara walk in at No. 3: Tendulkar

Cheteshwar Pujara, it was always reassuring to see you walk out at No. 3. You brought calm, courage, and a deep love for Test cricket every time you played. Out of many, the 2018-19 series win in Australia stands out, it wouldn't have been possible without your incredible resilience and match-winning runs — Sachin Tendulkar

TOP STUFF

He gave it his all for the country: Kumble hails Pujara's contribution

You have been a great ambassador of this wonderful game. We are all proud of your achievements on the cricket field. You gave it your all for the team! It was a privilege to have worked with you and may you continue to shine in your second innings — Anil Kumble on Pujara.

TRUSTED ALLY

Will always cherish our special Test wins together: Rahane

India cricketer Ajinkya Rahane hailed his long-time batting ally Cheteshwar Pujara and said: "Congratulations Pujji on a wonderful career. Loved every moment of playing alongside you and will always cherish our special Test wins together. Best wishes for the second innings," he said about the Saurashtra batsman.

TRADITIONAL STAR

A shining example of perseverance and selflessness, says BCCI

Pujara's career is an example of perseverance and selflessness. He personified the spirit of Test cricket. His immense powers of concentration made him the bulwark of India's batting. He showed it was possible to succeed at the highest level while staying true to traditional values of the game — BCCI Secretary Devajit Saikia

Pujara, the quintessential Test batter, calls it a day

The Saurashtra stalwart's uncanny ability to blunt opposition bowlers came to the fore time and again; the No. 3 was at his peak during India's maiden series triumph Down Under in 2018-19

CRICKET

Amol Karhadkar
MUMBAI

Cheteshwar Pujara, one of the foremost Test specialists of the 21st century, announced his retirement from all forms of cricket. The 37-year-old took to social media on Sunday morning to reveal his decision.

"As a little boy from the small town of Rajkot, along with my parents, I set out to aim for the stars; and dreamt to be a part of the Indian cricket team. Little did I know then that this game would give me so much – invaluable opportunities, experiences, purpose, love, and above all a chance to represent my State and this great Nation," Pujara wrote in a statement.

"Wearing the Indian jersey, singing the anthem, and trying my best each time I stepped on the field – it's impossible to put into words what it truly meant. But as they say, all good things must come to an end, and with immense gratitude I have decided to retire from all forms of Indian cricket."

Even though the 37-year-old last featured in a Test more than two years ago, Pujara was active on the domestic circuit. Saurashtra's Ranji Trophy quarterfinal loss to Gujarat in February turned out to be his last competitive appearance in a First Class career spanning almost two decades.

Out of his 278 First Class appearances, Pujara travelled in a majority of the 103 Tests he played for India.

While knee injuries curtailed his limited-over career – Pujara played the last of his five ODIs and the final one of his 30 IPL matches in 2014 – he emerged as the successor to Rahul Dravid at No. 3 in white flannels.

More than his tally of 7195 Test runs at 43.60, including 19 hundreds and 35 fifties, it was Pujara's ability to blunt bowling attacks that came to the fore time and again.

He was at his peak during India's maiden Test series triumph in Australia in 2018-19. Pujara not only scored 521 runs to finish as the top-scorer in the Border-Gavaskar Trophy, but also faced a whopping 1258 balls.

Pujara contributed to Saurashtra's emergence as a force to reckon with in domestic cricket. His tally of 21301 First Class runs is the fourth-highest by an Indian.

No Indian batter has scored more than Pujara's 18 double hundreds. He is also a member of an elite club which has notched up three triple hundreds.

Reliable performer: Pujara provided solidity at the No. 3 spot for more than a decade. GETTY IMAGES

Pujara's journey in the longest format

Your aggression was visible in your defence

A real warrior. He was instrumental in India being the No. 1 side for five years on the trot during my coaching stint... he was simply brilliant in the two back-to-back series wins in Australia. Well done, Puji

RAVI SHASTRI

His courage, grit and determination stood out and the body blows he took in the Gabba Test we won against Australia symbolised Pujara the cricketer for me: willing to give everything he has for his country

V.V.S. LAXMAN

Congratulations on a fabulous Test career, Cheteshwar. Your grit, determination and hard

work was inspiring... you can be very proud of what you have achieved

VIRENDER SEHWAG

Someone who always put his mind, body and soul for the country! Many congratulations on an outstanding career, Puji! See you on the other side!

YUVRAJ SINGH

He stood tall when the storm raged, he fought when hope was fading. Congratulations, Puji.

GAUTAM GAMBHIR

Your grit has always spoken before your name. Your aggression was visible in your defence and you made India proud, Puji

IRFAN PATHAN

An era of classical batting ends as Pujara walks into the sunset

K.C. Vijaya Kumar
CHENNAI

Solidity at the crease and a sense of dignity remained Cheteshwar Pujara's special attributes. As the Indian batter announced his retirement from cricket on Sunday, an era has ended.

In an age of bling and mighty sixes, Pujara was about classical batsmanship marinated in Test whites.

The old-fashioned batter wore down mighty bowling attacks, took blows on his body, and laid the foundation for effervescent teammates like Virat Kohli. It is a thread that links him to Rahul Dravid.

Both men largely did duty at No. 3 in Tests, they stemmed the initial crack, and they were a shield to the next man. In both cases, the No. 4 was a superstar, Sachin Tendulkar or Kohli, drawing raucous affection from the crowd.

Incidentally, Pujara made his Test debut in Dravid's hometown Bengaluru in 2010, against Australia, an opponent he often defied through his storied career.

One for the long haul A brisk second innings 72 in a winning chase marked out Pujara as one for the long haul. The promising start, however, was marred by injury, and a knee surgery and its after-effects affected him. But he returned and once Dravid retired, made the No. 3 spot his own.

Leaving the ball, defending as if his life-breath depended on it, and getting his eye in before essaying some shots, were all part of Pujara's copybook. Hailing from Rajkot and representing Saurashtra in First Class cricket, Pujara revealed an enormous appetite for runs.

Daddy hundreds were his norm and in Tests, the runs, doughty and enduring, flowed. As he finishes with 7195 runs averaging 43.60 from 103 Tests, and with 19 tons to boot, Pujara can look back with pride at a splendid career.

He last played for India in 2023; leading up to it, the runs had dried up. With Pujara preferring to rest his feet, a distinct stage in Indian cricket has concluded.

Ultimate tribute

Having moved into the commentator's chair, an ultimate tribute was paid to Pujara when Aussie speedsters, while talking to him on air, told him: "Good, not to bowl to you Puji."

They would know, as Pujara was a leading champion when India defeated

Etched in memory: Pujara, Kohli and Rahane shake a leg after India's maiden Test series win in Australia. FILE PHOTO: GETTY IMAGES

Australia in its backyard in the 2018-19 series. He scored three hundreds then, and in the 2020-21 away series, played a gritty hand as India prevailed over host Australia.

At 37, Pujara has decided to move on while his place in the pantheon of Indian batting greats is assured.

IN BRIEF

Sohil storms to victory from pole in IRL second round

Sohil Shah (Kolkata Royal Tigers) converted his spectacular pole position into a commanding victory in a start-stop race as the curtains came down on the second round of the Indian Racing League in Chennai on Sunday.

In the Indian F4 championship, which had three races on the day, Ishan Madesh was the standout driver, claiming a win and a third place. In race-4, Rotge claimed his second win of the weekend ahead of Luvviwe Sambudla and Saishiva.

Siddharth takes the honours in Thailand ITF tournament

Sixth seed Siddharth Rawat beat Markus Malaszszak of Thailand 6-4, 6-2 in the final of the \$15,000 ITF men's tennis tournament in Nakhon Pathom, Thailand, on Sunday. It was a fighting performance by Siddharth all the way, as he had won three of the earlier four rounds in three sets, that included a win over third seed Max Basing of Britain. It was the third singles title in the professional circuit for the 32-year-old, who trains with coach Gaurav Sharma in the Capital.

India thrashes Bhutan in SAFF U17 Women's Championships

Anuska Kumari scored a hat-trick as India thrashed host Bhutan 8-0 registering its third consecutive win at the SAFF U17 Women's Championships on Sunday. Besides Kumari's (53rd, 61st, 73rd), Abhishti Basnett (23rd, 89th) scored a brace while Pearl Fernandes (71st), Divyani Linda (77th), and Valaina Jada Fernandes (90+2) were also on target. India led 1-0 at half-time. With this dominant result, the Young Tigresses have now scored 17 goals in three matches without conceding once, tightening their grip on top of the table.

Rashid Khan to lead Afghanistan in Asia Cup

Rashid Khan, on Sunday, was named captain of a spin heavy Afghanistan squad for the upcoming Asia Cup.

The squad: Rashid Khan, Rahmanullah Gurbaz, Ibrahim Zadran, Darwish Rasooli, Sediqullah Atal, Azmatullah Omarzai, Karim Janat, Mohammad Nabi, Gulbadin Naib, Sharafuddin Ashraf, Mohammad Ishaq, Noor Ahmad, Mujeeb ur Rahman, AM Ghazanfar, Farid Ahmad Malik, Fazalhaq Farooqi, Naveen ul Haq.

Reserves: Wafiuullah Tarakhil, Nangeyala Kharote, Abdullah Ahmadzai.

South Delhi Superstarz women triumph in a thriller

It trumps Central Delhi Queens by one run in the summit clash; New Delhi Tigers clinch a nine-wicket win over Central Delhi Kings in a rain-curtailed encounter

DPL

Sports Bureau

NEW DELHI

South Delhi Superstarz won the women's competition in the Delhi Premier League, after beating Central Delhi Queens by one run in the final, at the Arun Jaitley Stadium on Sunday.

Defending a total of 121 for eight, Shweta Sehrawat and Co. restricted the Queens to 120 for eight.

With 18 runs needed and five wickets in hand going into the 19th over, Central Delhi must have fancied its chances, but Himakshi Choudhary snared two scalps with her leg-spin and gave away just three runs in the penultimate over.

Under gloomy skies, Tigers won the toss and opted to chase knowing that the weather wouldn't allow for the full 40 overs to be bowled.

Earlier in the men's competition, skipper Him-

Joyous bunch: The Superstarz girls relish their fantastic win. INSTAGRAM@DELHIPREMIERLEAGUE20

mat Singh's unbeaten 45 off 19 balls helped New Delhi Tigers clinch a nine-wicket win over Central Delhi Kings in a rain-curtailed encounter.

Under gloomy skies, Tigers won the toss and opted to chase knowing that the weather wouldn't allow for the full 40 overs to be bowled.

Central Delhi managed to reach 167 for eight in 19

wickets before rain intervened and brought the Duckworth-Lewis-Stern (DLS) method into play.

Tigers' target was revised to 69 from six overs, and they got there with an over to spare thanks to Himmat's big-hitting heroics.

Earlier, Jonty Sidhu contributed 75 to Kings' total. They could have provided a stiffer target if Pankaj Jaswal hadn't claimed three

wickets off four balls and conceded just six runs in the 19th over.

The scores: Women: Final:

South Delhi Superstarz 121/8 in 20 overs (Shweta Sehrawat 34) bt **Central Delhi Queens** 120/8 in 20 overs (Monika 33, Medhavi Bidhuri 3/26).

Men: **Central Delhi Kings** 167/8 in 19 overs (Jonty Sidhu 75, Kaushal Suman 30, Pankaj Jaswal 3/27) lost to **New Delhi Tigers** (6 overs) 69/1 in 5 overs (Himmat Singh 45 n.o.).

"But in the longer format, that approach doesn't work. In red-ball cricket, about 90% of your deliveries need to be your stock ball – consistent line and length are also required in the longer format, as it demands patience."

Encourage swing

"So, the focus was on tightening his line and length, spot bowling, and improving wrist position. We worked on those aspects to encourage natural swing."

"I personally felt he should've been given a chance in England. We spoke a few months ago when he was in England. He was feeling a bit restless and impatient about not getting an opportunity in the Test side."

"I told him 'you have to wait for your time. Test cricket is different – it tests your skills and temperament in a way no other format does, but I believe his skillset is very well suited for red-ball cricket too. Given his height, natural ability to swing the ball, and improved control,'" said Gagandeep.

Punjab gets the better of MP

Star performers: Uday (Punjab, 109); Aditya Purohit (Bengal, 122); Rishav (Jharkhand, 5/44); Chandrasekhar (TNCA XI, 5/67); Aditya Mishra (MP, 5/93).

BUCHI BABU

Sports Bureau

CHENNAI

Uday Pratap Saharan hammered a composed century (109), while skipper Anmolpreet Singh (72) and Ammol Malhotra (87) played crucial supporting roles to help Punjab gain a significant 165-run first-innings lead and pave the way for its six-wicket win over Madhya Pradesh on the final day of the All India Buchi Babu tournament at the MRF-Pachaiyappa's ground on Sunday.

The scores (round two, day three): Group-A: At Gojan-B: TNCA President's XI 384/9 & 4/2 in 5 overs drew with Maharashtra 228 in 74.1 overs (Prithiv Shaw 66, Harshal Kate 62, Siddharth Mhatre 42, C.V. Achyuth 3/50). **Points:** TNCA President's XI 3(9); Maharashtra 1(1).

At SSN: Himachal Pradesh 144 & 74/2 in 15.4 overs (Anuksh Bains 37 n.o.) drew with Chhattisgarh 227/6 dec'd. in 65.4 overs (Rishi Sharma 51, Ashutosh Singh 37, Sanjeet Desai 41, Amadeep Khare 37, Apoorav Walia 3/57).

Chhattisgarh 3(9); HP 0(1).

Group-B: At TI-Murugappa: Baroda 176 & 182/9 in 45 overs (Harsh Desai 32, Pradip Yadav 38, Vanshika Sharma 4/74, Abid Mushtaq 4/78) lost to Jammu & Kashmir 280 & 82/0 in 24.3 overs (Vivrant Sharma 34 n.o., Yawar Hassan 48 n.o.).

J&K 7(13); Baroda 0(6).

At SRMC (Turf): Odisha 222 & 184/8 in 45 overs (Swastik Samal 37, Om Munde 41, Akash Pandey 4/64) lost to Indian Railways 210 in 60.5 overs (Kush Marathe 33, Eshaan Goyal 31, Zubair Ali Khan 80, Sumit Sharma 4/110, Badal Biswas 3/57) & 197/5 in 38 overs (Ashish Singh 34, Eshaan Goyal 40, Dinesh Mor 67).

Railways 6(6); Odisha 0(0).

Group-C: At Gojan-A: TNCA XI 41/8 drew with Maharashtra 207 in 63.2 overs (Lakshya Dalal 73, Ankit Kumar 32, Dheeru Singh 36, D.T. Chandrasekhar 5/67). **TNCA XI 3(9); Maharashtra 1(1).**

3(9); Haryana 1(7).

At IITM-Chiplapost: Mumbai 266 drew with Bengal 325/5 in 90 overs (Aditya Purohit 122, Saubh Singh 86, Anupust Majumdar 34).

Bengal 3(3); Mumbai 1(1).

Group-D: At MRF-Pachaiyappa's: Madhya Pradesh 230/9 & 230/8 in 45 overs (Shubham Sharma 30, Soham Patwardhan 42, Akshat Dwivedi 39 n.o., Mangesh Yadav 75, Prerit Dutta 3/89) lost to Punjab 395/9 dec'd. in 88 overs (Uday Pratap Saharan 10, Anmolpreet Singh 72, Anmol Malhotra 87, Aditya Mishra 5/93) & 68/4 in 6.2 overs (Aditya Mishra 3/31).

Punjab 6(6); MP 0(6).

At Guru Nanak: Jharkhand 283 & 130 in 25.3 overs (Sharandeep Singh 39, Sourabh Shekhar 34, Tanay Thayagarajan 4/74, Aniket Reddy 3/25) lost to Hyderabad 330 in 82.4 overs (P. Nitish Reddy 106, Rahul Radesh 70, Varun Goud 59, Manishi 3/84, Rishav Raj 3/67) & 89/8 in 22.3 overs (G. Rahul Singh 35, Rishav Raj 5/44, Manishi 3/39).

Hyderabad 6(12); Jharkhand 0(0).

Gill is special: Punjab head coach Sandeep

Tarun Shastry

CHENNAI

Thirty-three years is a long time – just ask Punjab, and they'll tell you it feels even longer. The last time the State laid hands on a major red-ball title was back in the 1992-93 season, when it outclassed Maharashtra to be crowned champions of India's premier domestic competition, the Ranji Trophy. Now, head coach Sandeep Sharma is hoping to turn the tide. Sharma believes his team has both the talent and the skill to go the distance this time around.

He also spoke about India's Test captain Shubman Gill, who also represents Punjab, highlighting how his rise serves as an inspiration for the squad – along with Abhishek Sharma and Arshdeep Singh.

"We haven't had red-ball success for a long time. This time we've consciously taken steps to focus more on red-ball cricket", said Sharma. "We have a young and talented squad. We are guiding them while also learning from them.

Full of praise: Sandeep commended Gill's consistency and camaraderie with teammates. FILE PHOTO: K. BHAGYA PRAKASH

It's a process, and I feel we're in a good space at the moment", added Sharma.

"Shubman is a special player. I've seen him since he was around 15 years old – we knew even then that he was destined to go far. It was clear – Shubman was going to be world-class.

"Now he's the captain of the Indian team and vice-captain in the white-ball formats. He has worked closely with Yuvi (Yuvraj Singh), and they share a strong bond. During Covid, he and Abhishek Sharma trained and stayed together – they used to work out, practice, and push each other. That kind of discipline and hunger pays off.

Mirabai will be the cynosure of all eyes

The Tokyo Olympics silver medallist, returning to competition, has switched from 49kg to 48kg following a revamp in weight categories

Heave-ho! Union Sports Minister Mansukh Mandaviya tries his hand at lifting a weight at the inauguration in Ahmedabad on Sunday. VIJAY SONEJI

WEIGHTLIFTING

Sports Bureau

After her disappointing fourth-place finish in the Paris Olympic Games a year ago, Tokyo Olympics silver medallist Mirabai Chanu's return to competition will be the biggest attraction for the home crowd at the Commonwealth weightlifting championships, starting at the Veer Savarkar Sports Complex in Ahmedabad on Monday.

Going by her entry total of 192kg, seven kg less than her effort in Paris, the 31-year-old Mirabai is unlikely to push herself too hard.

Still, she is expected to claim a gold and secure a

berth in the Commonwealth Games as the championships here offer direct qualification for the Glasgow multi-sport event next year.

The championships will help former World champion Mirabai, who has recovered from injuries and has worked on some technical aspects, to test herself as she switches from 49kg to 48kg following a revamp in the weight categories.

Besides the Commonwealth Games, the Asian Games – where Mirabai has not won a medal – will be on top priority for the ace lifter in 2026.

Commonwealth Games silver medalist Bindyaranee Devi (58kg), bronze medalist Harjinder Kaur (69kg),

Rishikanta Singh (60kg), N. Ajith (71kg) and V. Ajay Babu (88kg) are some of the leading Indian names who will also eye Glasgow berths.

Prominent names

The field will have prominent foreign lifters, including Canada's double Olympians medallist Maude Charron (63kg) and Malaysia's 2022 Commonwealth Games gold medallists Aniq Kasdan (60kg) and Aznil Bidin (65kg), Nigeria's Rafiatu Lawal (58kg) and Australia's Eileen Cikamatana (86kg).

Around 290 lifters from 30 countries are expected to participate in the event, which will see competitions in senior, junior and youth divisions.

Raducanu, who describes the US Open as her "happy place" despite her record since 2021, said her mood was brightened by seeing

US OPEN

Associated Press
NEW YORK

Emma Raducanu bagged her first US Open victory since her fairytale 2021 title triumph on Sunday with a demolition of Japanese qualifier Ena Shibahara.

The Brit was in complete control, breaking Shibahara's serve regularly on way to a 6-1, 6-2 win on the Louis Armstrong Stadium showcourt.

It was Raducanu's first success at the US Open since she made history four years ago, winning the title as a little-known qualifier at the age of 18.

"I'm very pleased to have come through the opener," said Raducanu. "First rounds are very challenging always as you have handle the nerves... I wanted to win a match here really bad."

Happy place

Raducanu, who describes the US Open as her "happy place" despite her record since 2021, said her mood was brightened by seeing

familiar faces that she remembered from four years ago.

"There is this security guard who is still working here," she said. "Whenever I see him around – he was there from the start of the first round of qualifiers, second round, and all the way through to the final – it is really special."

Other results (first round):

Men: 16-Mensik (Cze) bt Jarry (Chi) 7-6(5), 6-3, 6-4; 18-Davidovich Fokina (Esp) bt Shevchenko (Kaz) 6-1, 6-1, 6-2; 6-Shelton (USA) bt Buse (Per) 6-3, 6-2, 6-4.

Women: 32-Kessler (USA) bt Linette (Pol) 7-5, 7-5.

12-Ruud vs Ofner

Raducanu solves the first round puzzle

Top-order fires as Australia-A beats India-A in one-off 'Test'

Press Trust of India
BRISBANE

The Australia-A top-order fired in unison after off-spinner Amy Edgar completed her five-wicket haul as the hosts defeated India-A by six wickets on the final day of the one-off women's 'Test' on Sunday.

Edgar (five for 57) claimed the scalp of V.J. Jositha in the second over of the day to get her five-for as India-A folded for 286 in its second innings, setting the hosts a 281-run target.

Australia-A's chase was anchored by half-centuries from Anika Learoyd (72), Rachel Trenaman (64) and Maddy Drake (68). It reached the target in 85.3 overs. Opener Trenaman and skipper Tahlia Wilson (46) gave the hosts a flying start, putting the Indian attack on the backfoot with a brisk 117-run partnership.

Just when it seemed the duo would bat India-A out of the contest, pacer Saima Thakor (two for 63) struck twice in successive overs.

She first removed Wilson and then had Trenaman caught behind by wicketkeeper Nandini Kashyap.

However, Drake and Learoyd combined for a commanding 136-run stand, batting with authority and flair.

Although India-A managed to get the duo out, the damage had already been done as the hosts cruised to victory.

The scores: India-A 299 & 286 in 81 overs (Shafali 52, Raghvi 86, Amy Edgar 5/57) lost to Australia-A 305 & 283/4 in 85.3 overs (Learoyd 72, Drake 68).

Drawing level: Torres celebrates after netting Barcelona's equaliser. AP

Barcelona mounts stunning comeback against Levante

EURO LEAGUES

VALENCIA

Barcelona staged a thrilling second-half comeback to defeat host Levante 3-2 in the La Liga on Saturday.

Barcelona fell behind early as Ivan Romero capitalised on space inside the box in the 15th minute. Alejandro Balde was then penalised for handball following a VAR review, and Jose Luis Morales converted the penalty.

Barcelona fought after the half-time break and Pedri pulled one back with a stunning strike in the 49th. Ferran Torres levelled the score just three minutes later.

The match appeared destined for a draw when Levante's Unai Elgezabal inadvertently headed Lamine Yamal's cross into his own net.

Fulham holds United
Manchester United is still searching for its first win of the season in the Premier League after squandering the lead in a 1-1 draw at Ful-

ham on Sunday. United missed a chance to take a first-half lead against Fulham when Bruno Fernandes blazed a penalty over the crossbar.

It needed an own-goal by Fulham striker Rodrigo Muniz to give United the lead in the 58th.

Substitute Emile Smith Rowe poked home a cross from Alex Iwobi for a 73rd-minute equaliser.

The results: Premier League: Crystal Palace 1 (Sarr 37) drew with Nottingham Forest 1 (Hudson-Odoi 57); Everton 2 (Ndiaye 23, Garner 52) bt Brighton 0; Fulham 1 (Rowe 73) drew with Manchester United 1 (Muniz OG 58).

LaLiga: Osasuna 1 (Budimir 9) bt Valencia 0.

On Saturday: LaLiga: Mallorca 1 (Morey 87) drew with Celta Vigo 1 (Ruiz 38); Atletico Madrid 1 (Sorloth 8) drew with Elche 1 (Mir 15); Levante 2 (Romero 15, Morales 45+7-pen) lost to Barcelona 3 (Pedri 49, Torres 52, Elgezabal 90+1-og).

Serie A: AC Milan 1 (Pavlovic 45) lost to Cremonese 2 (Baschirotto 28, Bonazzoli 61); Roma 1 (Wesley 53) bt Bologna 0.

Bundesliga: Borussia Moenchengladbach 0 drew with Hamburg 0; Mainz 0 lost to Cologne 1 (Buelter 90).

Hundreds by Head, Marsh, Green headline Australia's record-breaking win

Run-fest: Head and Marsh provided the launchpad before Green took off. AFP

Agence France-Presse

MACKAY

Cameron Green slumped a 47-ball century with Travis Head and Mitchell Marsh also blasting tons as Australia crushed South Africa by 276 runs in a record-breaking third and final One-Day International on Sunday in Mackay.

The host, playing for pride, posted an ominous 431 for two after opting to bat – its highest ODI total on home soil.

It then dismissed the Proteas for 155 in the 25th over, with spinner Cooper Connolly taking five for 22.

Head was supreme in blazing 142 off 103 balls, ably supported by skipper Marsh (100 from 106). Their 250-run platform at Great Barrier Reef Arena was Australia's highest ever opening partnership against the Proteas, bettering the 170 by Matthew Hayden and Adam Gilchrist in Durban in 2002.

Green then took over with a whirlwind 118 not out to mark the first time Australia's top three have all scored centuries. Alex Carey was unbeaten on 50, with the 18 sixes slogged between them also a record at home.

The scores: Australia 431/2 in 50 overs (Head 142, Green 118, Marsh 100) bt South Africa 155 in 24.5 overs (Brevis 49, Connolly 5/22). **Toss:** Australia.

Striking it rich: Sreeshankar's 8.27m effort fetched him the top prize while Rohit won the javelin and Ankita, below, claimed the steeplechase gold. R. RAGU

Rohit claims javelin gold, improves Worlds qualification chances

Sreeshankar tops in long jump but unlikely to make grade for the Tokyo showpiece; Anamika lands gold in heptathlon; Tamil Nadu bags the overall championship with a dominant display

ATHLETICS

K. Keerthivasan
CHENNAI

It's a no-brainer that Neeraj Chopra has inspired a generation of javelin throwers in India.

Though the National inter-State athletics meet at the Nehru Stadium here on Sunday had no javelin throwers making the cut through entry standards for the next month's World championships in Tokyo, Rohit Yadav, by claiming the gold with a personal best of 83.65m, has enhanced his chances of

making the grade through World ranking points.

If Rohit makes the cut, India, in all probability, will have four at the Worlds – apart from Neeraj, Sachin Yadav (World ranking 22) and Yashvir Singh (30). In the last Worlds in Budapest (2023), four qualified, but only three could go as Rohit got injured.

Sachin Yadav finished second with a throw of 83.20m in his fifth and penultimate attempt. However, Yashvir Singh ended up a disappointing fourth (76.22m).

All credit should go to Neeraj, the defending World champion for inspir-

ing youngsters. "If he (Neeraj) can do it, we, too can... That way, Neeraj has been an inspiration," added Rohit.

There were expecta-

tions that Murali Sreeshankar would qualify in men's long jump. Needing 8.27m to make the grade for the Worlds, the 26-year-old produced an 8.06m, which won him the gold, but unlikely he will make it to Tokyo through World rankings.

"I think I'll just miss out by probably one or two spots. Whatever has happened, I'll just embrace it. I'm happy. Because last year, this day, I wasn't even sure that I'll be jumping again," Sreeshankar, who returned to competition in July after 15 months of surgery and recuperation, said.

The results: Men: Javelin: Rohit Yadav (UP) 83.65m; long jump: Murali Sreeshankar (Ker) 8.06m; Steeplechase: Balkishan (Har) 8:51.17s; 4x400m relay: TN (T. Santhosh, T. Yokesh, Rajesh Ramesh, Vishal T. K.) 3:07.53s.

Women's: 10000m: Ravina Gayakwad (Mah) 35:09.57s; High jump: K. Gobika (TN) 1.80m; 3000m Steeplechase: Ankita Dhiyani (Uttar) 9:44.83s;

Heptathlon: Anamika K. A. (Ker) 5466; 4x400m relay: Karnataka (D. Gowda, Disha Alroe, Priya Mohan, Poovamma Raju) 3:38.29s.

Best athlete: Men: Vishal; Women: Ankita. **Team Championships:** Men: TN (101); 2. UP (58); Women: 1. TN (90); 2. Haryana (63).

Overall championships: 1. TN (195); 2. Haryana (121).

from Olympian Chain Singh and Akhil Sheoran who also made the finals, but finished fourth and fifth respectively.

Together the Indian trio was beaten to the gold by China, by three points.

Adriyan sizzles

Yet, there was no stopping the Indian gold rush, as Adriyan Karmakar won the junior title with an impressive Asian record of 463.8 in the final, as he outclassed the field, and beat Han Yinan of China by 4.2 points.

It was the second individual gold in the Asian championship for the two-time Olympian, the 24-year-old Aishwary, who had won the earlier title in 2023 in Changwon, Korea.

In fact,

Aishwary Pratap wins gold in rifle 3-position event

SHOOTING

Sports Bureau
NEW DELHI

Aishwary Pratap Singh Tomar beat the qualification topper Zhao Wenyu (587) of China by half-a-point to clinch the gold in the 50-metre rifle 3-position event in the 16th Asian shooting championship in Shymkent, Kazakhstan, on Sunday.

It was the second individual gold in the Asian championship for the two-time Olympian, the 24-year-old Aishwary, who had won the earlier title in 2023 in Changwon, Korea.

In fact, Aishwary had won the silver last year and has also three individual gold medals from World Cups.

It was impressive fare

team gold, with Rohit Kanyan shooting a 575. Korea finished second ahead of China.

Top of the heap

India was sitting pretty on top of the medals table with 26 gold, nine silver and 11 bronze.

The results: 50m rifle 3-position

Men: 1. Aishwary Pratap Singh Tomar 462.5 (584); 2. Zhao Wenyu (Chn) 462.0 (587); 3. Naoya Okada (Jpn) 448.8 (585); 4. Chain Singh 435.7 (582); 5. Akhil Sheoran 424.9 (581); RPO: Kiran Jadhav 584; Babu Singh Panwar 574.

Team: 1. China 1750; 2. India 1747; 3. Korea 1740.

Juniors: 1. Adriyan Karmakar 463.8 (576); 2. Han Yinan (Chn) 459.6 (578); 3. Vedant Waghmare 448.8 (582); 10. Sami Ullah Khan 575; 12. Rohit Kanyan 575; 16. Gaurav Desale 569; 17. Hithesh Srinivasan 564.

Team: 1. India 1733; 2. Korea 1722; 3. Kazakhstan 1712.

Can Jaiswal decode consistency?

The Asia Cup snub should motivate the explosive opener from Mumbai to focus on the red-ball assignments at home starting with the Duleep Trophy followed by the series against the West Indies and South Africa

R. Kaushik

Jayashri Jaiswal loves to enjoy himself; he loves the word 'enjoy'. Period. In his press conference at the Oval, after bringing up his second century of the Test series in England earlier this month, he used 'enjoy' and its variants a staggering 17 times (we are not kidding, we did keep count) in 10 minutes. Enjoy the contest. Enjoy batting. Enjoy the challenge of the moving ball. Enjoying myself. Enjoyed getting another hundred...

Enjoyment is something the flashy left-hander has provided in abundance in his two years as an international cricketer. Yes, sometimes, it is hard to fathom that he is just two years young at the highest level. After all, in such a short span of time, he has already achieved so much - 2,000-plus Test runs in 24 matches, six centuries including two double-hundreds, four tons away from home, and a Twenty20 International strike-rate of 164.31 and an average of 36.15 in 22 innings, among them a highest of 100 and five other half-centuries.

Now a Mumbaikar in every sense after having made the move from remote Suriyawan in Uttar Pradesh nearly a decade and a half back to pursue his interest in cricket, Jaiswal won't turn 24 until towards the end of the year. To be 23 and footloose is a gift and joy that has passed many of us by, but Jaiswal isn't just any other 23-year-old. When he walks out with a bat in hand, especially as part of the national team, he is one of 11 on whom so much hinges, on whom there is so much attention and scrutiny, expectations and pressure.

Astounding numbers
For now, he has handled these demands expertly without compromising on his organic flair. By nature an attacking batter, Jaiswal is scoring at 66.21 runs per 100 balls faced in Test cricket, an extraordinary number that, considering he has played exactly half his 24 games in South Africa, Australia and England. Already, he has hundreds in the Caribbean (171 on debut), in Australia and England (2), something numerous openers before him haven't stitched together in their entire careers. And it is fair to say that Jaiswal is still in the very early stages of his career and that unless something goes drastically wrong, he has a long and distinguished road ahead of him.

Occasionally, like any other human being but especially for someone still so young, he does have rushes of blood. He will stand with his feet firmly nailed to the ground and throw his hands at the ball outside off because, well, he sees a scoring opportunity. Sometimes, he makes no contact. At other times, he manages a healthy edge that sails over the slip cordon. From time to time, he will find the wicketkeeper or the slips off the outside edge and exit the ground, embarrassed and well aware that he has let his fans, his teammates and himself down, that a justified torrent of criticism is in store. But that's the very nature of a game where failure is more the norm than success and where the secret is to try and prolong the gap between failures.

England was touted to be Jaiswal's big test, not unlike the challenge he flunked on spicier, supremely bowling-friendly surfaces in Centurion and Cape Town a year and a half previously. With the fast bowlers from both sides having a field day (India wrapped up a two-day, series-leveelling win at Newlands on the back of the heroics of Mohammed Siraj and Jasprit Bumrah), Jaiswal mustered just 50 runs in four innings, which seemed to suggest at the time that scores of 171, 57 and 38 in July 2023 against the West Indies were just a false dawn.

How wrong he was to prove everyone. Back at home the same month (January 2024) after making 0 and 28 in Cape Town, Jaiswal warmed up for what was to come with a blazing 80 in the first of five Tests against England, then followed it up with 209 and 214 not out to become just the third India after Vinod Kambli, the maverick left-hander, and one-time run-machine Virat Kohli to stack up successive Test double hundreds. He marked his debut in Australia with 161 of the finest in the second innings of the first Test in Perth and overcame a poor run thereafter with 82 and 84, two innings of great contrast, at the MCG. In Australia, they had turned up in their thousands to watch Kohli get to work. The former captain disappointed after promising so much with a second-innings ton in Perth, but the hard-nosed Aussies found a new star to back and harass (their way of expressing appreciation and respect) in the form of the lithe, loose-limbed left-hander who thought little of carving Mitchell Starc's first ball of a Test over the cover fielder and to the boundary.

GETTY IMAGES

At the risk of sounding unreasonable and unjust, if there is one area that Jaiswal needs to pay attention to, it is consistency. Between his 161 in Perth and the twin 80s in Melbourne, he had scores of 0, 24, 4 and 4*; in England over the summer, between 87 in Birmingham and 118 in the final innings of the series at the Oval, he managed 28, 13, 0, 58, 0 and 2. One can argue that that's the lot of an opening batter in Test cricket, when the bowlers are at their freshest and the ball at its newest and potentially most threatening.

GETTY IMAGES

Even accounting for that, Jaiswal will be the first to admit that he got himself out more often than bowlers getting him out, not least in the second innings at Lord's.

India were chasing 193 to open up a 2-1 lead when Jaiswal's ambitiousness got the better of him. Jofra Archer, playing his first Test in more than four years, produced a 141 kmph first ball that got big on the left-hander; for some strange reason, Jaiswal decided the pull was on. Beaten for pace and by the extra bounce that the strong right-hander procured, all he managed was a top edge that sailed straight up in the air and came down inside wicketkeeper Jamie Smith's huge gloves. Jaiswal gone for duck, the manner of the dismissal sparking fury among the fans and in the dressing room, where he was greeted with cold stares and shoulder while he desperately tried to avoid eye contact.

Unforgiving and greedy
If he already hasn't learnt his lessons, Jaiswal will do so quickly. He is smart enough to understand that the going will always not be good and therefore it is imperative to cash in when things fall in place. It's hard to point to inconsistency when one is averaging in excess of 50, but cricket followers especially are unforgiving and greedy; greed is a trait Jaiswal himself is trying to inculcate - the greed for runs, that is.

Several of his colleagues have pointed to a tendency to 'space out' in the field that Jaiswal must rectify soon. There are times when he seems caught up in his own world, a little oblivious to what's happening around him. Bowlers and captain Shubman Gill were tested in trying to grab his attention once he was banished to the outfield from the second Test onwards after shelling quite a few catches in the gully in the opener in Leeds. There is some work to be done on that front, though otherwise from a work-ethic perspective, he can hardly be faulted. Often, he is the first to hit the nets and the last to leave a practice session, batting long hours on specifics and enjoying the feel of ball on bat without compromising on improving his defensive game.

Jaiswal would have fancied his chances of earning a recall to the T20I team for

the Asia Cup in the Emirates next month, but that wasn't to be. Despite having been a part of the side that won the World Cup in Bridgetown last June (he didn't get to play a single game then as India opened with skipper Rohit Sharma and Kohli), he is currently surplus to requirement.

Jaiswal's T20I record speaks for itself and he had an excellent IPL 2025, but Abhishek Sharma's brilliance in India colours and the fact that he can also weigh in with his left-arm spin has postponed Jaiswal's comeback. In many quarters, there is a strong belief that his record commanded Jaiswal's inclusion ahead of Gill, but clearly, the latter is being groomed for greater responsibilities from a leadership point of view and the decision-makers believed that there could be no compromise on that front.

Disappointed as Jaiswal must be, there is nothing he can do about that. His time in T20Is will come, possibly sooner than later, but with the Asia Cup no longer on his calendar, he has time to refamiliarise himself with the challenge of facing the SG Test ball. India's last home Test was in November (a forgettable final act of a 0-3 meltdown against New Zealand); from October 2, they will play four Tests in their backyard in eight weeks, two each against West Indies and WTC champions South Africa. The Kiwi shock has meant home victories can no longer be taken for granted, and India have much work ahead of them as they seek valuable WTC points after a more than passable visit to England.

Jaiswal will again take it upon himself to set the tone at the top of the innings. He will have the Duleep Trophy, beginning later this week in Bengaluru, to get back into match mode. Jaiswal has struck up an excellent relationship with the more seasoned K.L. Rahul at the top of the Test batting tree, like he had done with Rohit for his first 14 Tests. Rahul is the ice to Jaiswal's fire, which must continue to burn bright if India are to exorcise the ghosts of the Kiwi nightmare.

The world is Jaiswal's oyster and he knows it. Despite Rohit and Kohli's retirement, he is still in the shadows of Gill and Rishabh Pant and while it may not bother him, it won't be long before he makes his moments under the sun more sustained and consistent.

THE GIST

▼
Already, Jaiswal has hundreds in the Caribbean (171 on debut), in Australia and England (2), something numerous openers before him haven't stitched together in their entire careers.

SCIENCE

Is India underestimating the cost of dealing with invasive species?

In a new assessment, non-native plants have emerged as the most economically impactful invasive species worldwide as well as the costliest group vis-à-vis the cost of management, demanding \$926 billion in 1960-2022; next in line were arthropods (\$830 billion) and mammals (\$263 billion)

Monika Mondal

Damage from non-native plants and animals expanding into new ecosystems has cost society more than \$2.2 trillion worldwide, a new study by an international team of researchers has said.

Published in *Nature Ecology & Evolution*, the study used numbers from InvaCost, a public database that records the economic costs of biological invasions by country, and modelling exercises to analyse data from 1960. It concluded that costs may have been underestimated by 16x over previous estimates.

Beyond global economic losses, the study also modelled the impact in 78 countries for which no data was previously available. In India, a nation grappling with numerous environmental and economic challenges, the findings underscore an oft-overlooked financial drain.

A global discrepancy

Europe was found to have the highest potential impact in absolute terms at \$1.5 trillion (71.45% of global cost), followed by North America (\$226 billion), Asia (\$182 billion), Africa (\$127 billion), and Australia and Oceania (\$27 billion).

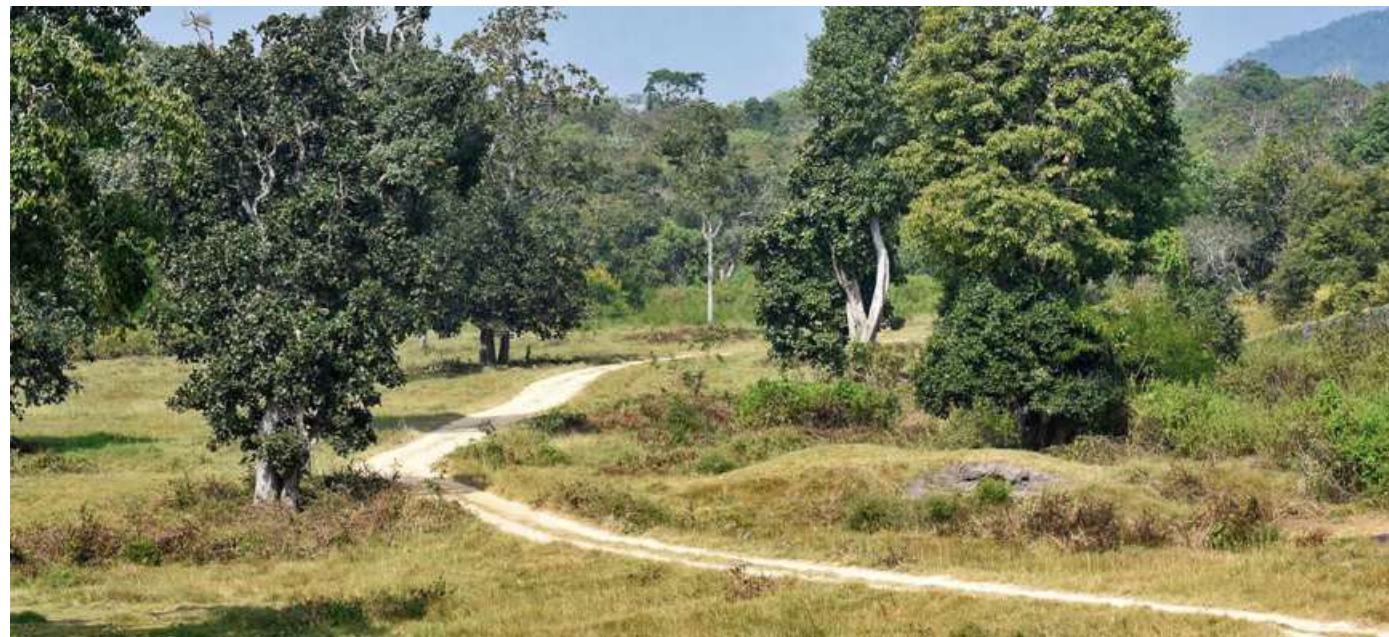

Brian Leung, one of the lead researchers and the UNESCO Chair for Dialogues on Sustainability, said, "The cost of invasions might just be higher because of the cost of things in Europe. There's more to damage, the cost of the agricultural products, and the cost of management might be higher."

The study did not estimate a total economic damage figure for India in absolute terms but emphasised the magnitude of underreported management costs. In fact, among all the countries assessed, the study found India had the highest percentage discrepancy of management expenditure: 1.16 billion percent.

Per the study, this exceptionally high disparity suggests a significant amount of management spending in India has likely been unrecorded or underreported in the existing data, leading to a substantial "hidden" cost. The researchers were careful to note that India's limited resources could have contributed as much to this gap as a recording bias in the InvaCost database, which may be overlooking reports in languages predominant in Africa and Asia.

Europe reported a discrepancy of 15.044%, followed by Asia (3.090%), and Africa (1.944%). The median cost discrepancy among the assessed countries was 3.241%.

Mr. Leung said he was unsure if

India-level specifics or how the figures break down, but noted that general management strategies could include different elements like prevention, eradication, control or suppression, and efforts to slow the spread of invasion. "These are all tools used for managing invasions," he said.

S. Sandilyan, a former fellow on Invasive Alien Species at the Centre for Biodiversity Policy and Law in Chennai, said the findings of the study are plausible. "India is falling short in documenting, reporting, and strategically funding biological invasion management. Lack of centralised data systems, limited inter-agency coordination, and competing conservation priorities exacerbate this

Who are the invaders?

Plants emerged as the most economically impactful invasive species worldwide as well as the costliest group vis-à-vis the cost of management, demanding \$926.38 billion in 1960-2022. Next in line were the arthropods (\$830.29 billion) and mammals (\$263.35 billion). The researchers speculated that these species spread to new ecosystems – where they could thrive at the cost of its incumbents – primarily through trade and travel, helped along by globalisation and bilateral deals. They singled out Japanese knotweed (*Reynoutria japonica*) and common lantana (*Lantana camara*) to be among the costliest to manage per square kilometre.

Leung, however, cautioned that simply eradicating all invasive species would make the problem worse. "A lot of the agricultural products that dominate our system now are not native," he said.

India is falling short in documenting, reporting, and funding invasion management. Lack of centralised data systems, limited coordination, and competing conservation priorities exacerbate this

"Invasive species transport is a byproduct of trade and importation of living organisms because we want them, and sometimes these are the driving forces behind invasions," Mr. Leung added. "Europe has been doing that for a long time."

This presents a two-faceted challenge: on one hand, there is an imperative to mitigate economic losses; on the other, there is the desire to foster further globalisation. Thus, according to Mr. Leung, efforts must simultaneously be made to curtail the spread of invasive species and address global warming by increasing vegetation. Given these complex, intersecting objectives, reconciling these disparate goals in studying invasive species becomes a significant challenge, he added.

Control measure

The study also acknowledged that several international policies to deal with invasive species are in place, which scientists at large believe have had a positive effect on reducing the rate of biological invasions. Key among them is a regulation concerning shipping traffic and trade

practice: the International Convention for the Control and Management of Ships' Ballast Water and Sediments (a.k.a. Ballast Water Management Convention), which is designed to prevent the spread of harmful aquatic organisms from one region to another via ships' ballast water.

Likewise, regulations under the Convention on Biological Diversity call on parties (including India) to "prevent the introduction of, control, or eradicate those alien species which threaten ecosystems, habitats, or species."

These international agreements underscore a global recognition of the threat posed by invasive species and efforts to mitigate their spread through various control points.

As for management costs, Mr. Leung said response strategies can range from preventing new invasions aiming for complete eradication of established populations or controlling their spread to minimise impact.

The large discrepancies in reported costs also underscore the need for improved data collection, comprehensive tracking of expenditures, and robust reporting mechanisms.

"For example, even though the cost estimates in Africa are really quite limited, it doesn't mean the damages are limited," he explained.

While the study does not say anything about the state of invasive species, it may be a call to action. Its specific analysis and the database were based on the measured economic costs, according to Mr. Leung, "because it's often easier to measure and people often understand money better."

BIG SHOT

A simulated Mars exterior portion of NASA's Crew Health and Performance Exploration Analog (CHAPEA) is seen at the Johnson Space Centre in Houston, August 22, 2025. CHAPEA is a 3D-printed habitat designed to serve as an analog for one-year missions. This mission will have four crew members and it will start in late fall 2025. AFP

WHAT IS IT?

Cloudburst: when the balloon pops

Vasudevan Mukunth

A cloudburst is a sudden and intense rainfall event that can transform weather conditions within minutes. Unlike the steady and large-scale downpour typical of monsoon rains, a cloudburst is localised, often drenching a small area with an extraordinary amount of water.

The India Meteorological Department (IMD) defines a cloudburst as rainfall of more than 100 mm in one hour over an area of about 2030 sq. km. This threshold is used in India to identify events that can lead to flash floods and landslides, especially in mountainous areas.

The World Meteorological Organisation (WMO) defines cloudbursts differently, however: as rain pouring down at a rate of 100 mm per hour or more. The WMO definition also makes reference to the Swedish term 'skyfall', which is described as 1 mm per

minute, or 60 mm per hour for short bursts and 50 mm per hour when sustained for longer periods.

Other references describe the phenomenon by its physical process rather than by rainfall numbers. Cloudbursts often occur when strong updrafts in thunderstorms hold large amounts of water high in the atmosphere. When the updraft collapses, this water is released suddenly, resulting in an intense downpour.

Scientific papers have also highlighted the role of orographic lifting, where moist air is forced upwards by mountains, leading to rapid condensation and heavy rain.

This said, all definitions agree that a cloudburst is short-lived and very intense, and is capable of causing severe damage. The area of effect could be larger, however, depending on where the water flows.
